Course guide
390210 - AMIVA - Market Analysis and Agricultural Valuation

Unit in charge: Barcelona School of Agri-Food and Biosystems Engineering
Teaching unit: 745 - DEAB - Department of Agri-Food Engineering and Biotechnology.

Degree: BACHELOR'S DEGREE IN AGRICULTURAL ENGINEERING (Syllabus 2009). (Compulsory subject).
BACHELOR'S DEGREE IN AGRICULTURAL, ENVIRONMENTAL AND LANDSCAPE ENGINEERING (Syllabus 2009). (Compulsory subject).
BACHELOR'S DEGREE IN FOOD ENGINEERING (Syllabus 2009). (Compulsory subject).
BACHELOR'S DEGREE IN AGRONOMIC SCIENCE ENGINEERING (Syllabus 2018). (Compulsory subject).

Academic year: 2022  ECTS Credits: 6.0  Languages: Catalan, Spanish

LECTURER
Coordinating lecturer: JOSE MARIA GIL ROIG
Others: OSCAR ALFRANCA
ZEIN KALLAS

REQUIREMENTS
It is advisable to have passed the topic Statistics from Q3

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES
Specific:
1. Valuation of agricultural firms and commercialization.

TEACHING METHODOLOGY
The teaching methodology combines different learning tools addressed to facilitate the student?s comprehension of the content of this topic as well as to enhance their ability to apply the learned knowledge of day-to-day case studies. On one hand, there will be a series of theoretical concepts that the Professor will transmit in traditional lectures, combined with practical exercises aimed at the application of the acquired knowledge. Practical exercise will cover a wide range of activities from the review of scientific papers, public defense of small case studies and resolution of economic problems. In all cases, the teaching methodology will use learning cooperative tools to facilitate student?s participation. Finally, in all cases, lectures would benefit from the use of upgraded ICT tools.

LEARNING OBJECTIVES OF THE SUBJECT
At the end of the course, students should be able to understand the concept of Agro-food Markets and the complexity of the existing interrelationships among market agents (from farm to fork), as well as the role of the public sector. Furthermore, students should be able to critical use the economic models (understood as a simple representation of reality), and to be aware about their limitations. In the same context, students should be able to explain the current situation of a specific food sector taking into account also its growing globalization. Finally, students should be able to economically value agricultural assets: trees, agricultural land, agricultural holdings, future harvests and machinery.

Total learning time: 150 h

CONTENTS

INTRODUCTION TO FOOD MARKETS

Description:
Content:
- Concept, classification and functioning of food markets.
- Classification of food markets taking into account the level of competition

Related activities:
- Activity 1: Theoretical lectures
- Activity 2: Individual assessment
- Activity 3: Exercise resolution (homework).
- Activity 4: Final project.

Full-or-part-time: 14h
- Theory classes: 4h
- Self study: 10h

THEORY OF AGROFOOD MARKETS

Description:
Content:
- Introduction to Economics
- Supply and Demand of food products
- Types of markets: perfect competition, monopoly and oligopoly

Related activities:
- Activity 1: Theoretical lectures
- Activity 2: Individual assessment
- Activity 3: Exercise resolution (homework).
- Activity 4: Final project.

Full-or-part-time: 65h
- Theory classes: 17h
- Practical classes: 8h
- Self study: 40h
EMPIRICAL ANALYSIS OF AGROFOOD MARKETS

Description:
Content:
price analysis: time series tools
Regression analysis
Empirical analysis of supply and demand

Related activities:
Activity 1: Theoretical lectures
Activity 2: Individual assessment
Activity 3: Exercise resolution (homework).
Activity 4: Final project.

Full-or-part-time: 58h
Theory classes: 15h
Practical classes: 8h
Self study: 35h

AGRICULTURAL VALUATION

Description:
Content:
Introduction to agricultural valuation
Valorization of agricultural holdings

Related activities:
Activity 1: Theoretical lectures
Activity 2: Individual assessment
Activity 3: Exercise resolution (homework).

Full-or-part-time: 13h
Theory classes: 4h
Practical classes: 4h
Self study: 5h

ACTIVITIES

ACTIVITY 1: THEORETICAL LECTURES

Full-or-part-time: 98h
Theory classes: 38h
Practical classes: 60h
ACTIVITY 2: INDIVIDUAL ASSESSMENT

Description:
Students should pass a written exam about the theoretical concepts in sections 1, 2, 3 and 4

Delivery:
Oral Exam resolution which will account for 50% of the final grade

Full-or-part-time: 2h
Theory classes: 2h

EXERCISE RESOLUTION (HOMEWORK)

Description:
We will solve practical exercises that students should have prepared before at home

Material:
Exercises available at ATENEA

Delivery:
Students should deliver the assigned tasks, either individually or in couples, depending on the specific task. The lecturer should provide feedback to students about the outcome

Full-or-part-time: 26h
Laboratory classes: 16h
Self study: 10h

ACTIVITY 4: PROJECT

Description:
Students should deliver a final project, individually or in a group of two. The project will be addressed to the analysis of an agrofood sector and will consist of 3 stages:
1. descriptive analysis of the subsector as well as its recent evolution
2. Quantitative analysis of the demand and prices of a food product using the analytical tools showed during the course
3. Some concluding remarks and proposition of solutions

Material:
databases from the Departament d'Agricultura, Alimentació y Pesca (DARP) (www.gencat.cat/darp) of the Generalitat de Catalunya, as well as the databases from Ministerio de Agricultura, Alimentación, Pesca y Medioambiente (MAPAMA) (www.marm.es) and international: EU (www.eurostat.eu) and FAO (www.fao.org).

Delivery:
It will be delivered through ATENEA and will represent 35% of the final grade

Full-or-part-time: 24h
Laboratory classes: 4h
Self study: 20h

GRADING SYSTEM

The final grade (Nfinal) will be a weighted average of four components:
N1: 3 Written exams. Introduction to food markets + empirical analysis 45%, theory of markets 40%, agricultural valuation 15%
N3: 2 projects
Nfinal = 0,55N1 + 0,45N2
EXAMINATION RULES.
