### Requirements

It is advisable to have passed the topic Statistics from Q3

### Degree competences to which the subject contributes

**Specific:**
1. Valuation of agricultural firms and commercialization.

### Teaching methodology

The teaching methodology combines different learning tools addressed to facilitate the student?s comprehension of the content of this topic as well as to enhance their ability to apply the learned knowledge of day-to-day case studies. On one hand, there will be a series of theoretical concepts that the Professor will transmit in traditional lectures, combined with practical exercises aimed at the application of the acquired knowledge. Practical exercise will cover a wide range of activities from the review of scientific papers, public defense of small case studies and resolution of economic problems. In all cases, the teaching methodology will use learning cooperative tools to facilitate student?s participation. Finally, in all cases, lectures would benefit from the use of upgraded ICT tools.

### Learning objectives of the subject

At the end of the course, students should be able to understand the concept of Agro-food Markets and the complexity of the existing interrelationships among market agents (from farm to fork), as well as the role of the public sector. Furthermore, students should be able to critical use the economic models (understood as a simple representation of reality), and to be aware about their limitations. In the same context, students should be able to explain the current situation of a specific food sector taking into account also its growing globalization. Finally, students should be able to

Theory classes: 38h  
Practical classes: 60h |
|----------------------------------|----------------|
| ACTIVITY 2: INDIVIDUAL ASSESSMENT | Hours: 2h  
Theory classes: 2h |
| **Description:** | Students should pass a written exam about the theoretical concepts in sections 1, 2, 3 and 4 |
| **Descriptions of the assignments due and their relation to the assessment:** | Oral Exam resolution which will account for 50% of the final grade |
| EXERCISE RESOLUTION (HOMEWORK) | Hours: 26h  
Laboratory classes: 16h  
Self study: 10h |
| **Description:** | We will solve practical exercises that students should have prepared before at home |
| **Support materials:** | Exercises available at ATENEA |
| **Descriptions of the assignments due and their relation to the assessment:** | Students should deliver the assigned tasks, either individually or in couples, depending on the specific task. The lecturer should provide feedback to students about the outcome |
| ACTIVITY 4: PROJECT | Hours: 24h  
Laboratory classes: 4h  
Self study: 20h |
| **Description:** | Students should deliver a final project, individually or in a group of two. The project will be addressed to the analysis of an agrofood sector and will consist of 3 stages:  
1. descriptive analysis of the subsector as well as its recent evolution  
2. Quantitative analysis of the demand and prices of a food product using the analytical tools showed during the course  
3. Some concluding remarks and proposition of solutions |
| **Support materials:** | databases from the Departament d'Agricultura, Alimentació y Pesca (DARP) (www.gencat.cat/darp) of the Generalitat de Catalunya, as well as the databases from Ministerio de Agricultura, Alimentación, Pesca y Medioambiente (MAPAMA) (www.marm.es) and international: EU (www.eurostat.eu) and FAO (www.fao.org). |
| **Descriptions of the assignments due and their relation to the assessment:** | It will be delivered through ATENEA and will represent 35% of the final grade |
Qualification system

The final grade (Nfinal) will be a weighted average of four components:
N1: Written exams.
N2: Exercises resolution (homework)
N3: Final projects
CG: Generic Skills
Nfinal = 0,5N1 + 0,05N2 + 0,35N3 + 0,10CG
