DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:

TEACHING METHODOLOGY

LEARNING OBJECTIVES OF THE SUBJECT

On successfully completing the schedule of this course the student will learn:
- all about existing problems in the food industry because of generation of wastewater and waste and its management
- the technologies of treatment more important
- options of pollution valorization and minimization
- the environmental management tools applicable to the food industry to improve its environmental behaviour.

This knowledge should enable students to:
- propose measures organizational, operational and technology to minimize the amount and/or hazard of the waste generated in food industries.
- make sustainable decisions from the environmental point of view.

Total learning time: 150 h
# CONTENTS

## INTRODUCTION

**Description:**
Environmental problems of the food industry in the areas of waste and wastewater.

**Full-or-part-time:** 2h 30m  
Theory classes: 1h  
Self study : 1h 30m

## WASTEWATER TREATMENT OF FOOD INDUSTRIES

**Description:**
Wastewater treatment of food industries: physical, chemical and biological processes.  
Intensive and extensive wastewater treatment systems.  
Treatment and management of sewage sludge of food industries.  
Sanitation normative aspects and water taxes.

**Full-or-part-time:** 80h  
Theory classes: 20h  
Laboratory classes: 12h  
Self study : 48h

## INDUSTRIAL WASTE MANAGEMENT

**Description:**
Characterization of the most significant residues of the food industry and associated problems.  
Valorization of organic waste from the food industry.  
Industrial waste management.

**Full-or-part-time:** 22h 30m  
Theory classes: 5h  
Laboratory classes: 4h  
Self study : 13h 30m

## POLLUTION MINIMIZATION

**Description:**
Cleaner production.  
Pollution prevention in food industries by sectors.

**Full-or-part-time:** 18h  
Theory classes: 4h  
Laboratory classes: 2h  
Self study : 12h
ENVIRONMENTAL MANAGEMENT TOOLS

Description:
Environmental management tools.
The 20/2009 law of prevention and environmental control of activities.

Full-or-part-time: 25h
Theory classes: 8h
Laboratory classes: 2h
Self study : 15h
