390227 - GAIA - Environmental Management of Food Industries

Degree competences to which the subject contributes

Specific:

Learning objectives of the subject

On successfully completing the schedule of this course the student will learn:
- all about existing problems in the food industry because of generation of wastewater and waste and its management
- the technologies of treatment more important
- options of pollution valorization and minimization
- the environmental management tools applicable to the food industry to improve its environmental behaviour.

This knowledge should enable students to:
- propose measures organizational, operational and technology to minimize the amount and/or hazard of the waste generated in food industries.
- make sustainable decisions from the environmental point of view.

# INTRODUCTION

**Learning time:** 2h 30m  
Theory classes: 1h  
Laboratory classes: 0h  
Self study: 1h 30m  

**Description:**  
Environmental problems of the food industry in the areas of waste and wastewater.

# WASTEWATER TREATMENT OF FOOD INDUSTRIES

**Learning time:** 80h  
Theory classes: 20h  
Laboratory classes: 12h  
Self study: 48h  

**Description:**  
Wastewater treatment of food industries: physical, chemical and biological processes.  
Intensive and extensive wastewater treatment systems.  
Treatment and management of sewage sludge of food industries.  
Sanitation normative aspects and water taxes.

# INDUSTRIAL WASTE MANAGEMENT

**Learning time:** 22h 30m  
Theory classes: 5h  
Laboratory classes: 4h  
Self study: 13h 30m  

**Description:**  
Characterization of the most significant residues of the food industry and associated problems.  
Valorization of organic waste from the food industry.  
Industrial waste management.

# POLLUTION MINIMIZATION

**Learning time:** 18h  
Theory classes: 4h  
Laboratory classes: 2h  
Self study: 12h  

**Description:**  
Cleaner production.  
Pollution prevention in food industries by sectors.
**ENvironmental Management Tools**

**Learning time:** 25h
- Theory classes: 8h
- Laboratory classes: 2h
- Self study: 15h

**Description:**
- Environmental management tools.
- The 20/2009 law of prevention and environmental control of activities.
