804251 - FMN - Financiation and Business Models

Coordinating unit: 804 - CITM - Image Processing and Multimedia Technology Centre
Teaching unit: 804 - CITM - Image Processing and Multimedia Technology Centre
Academic year: 2018
Degree: BACHELOR'S DEGREE IN VIDEO GAME DESIGN AND DEVELOPMENT (Syllabus 2014). (Teaching unit Compulsory)
ECTS credits: 6
Teaching languages: English

Teaching staff
Coordinator: Patton Ripoll, Liam Winston

Degree competences to which the subject contributes

Specific:
CEVJ 10. (ENG) Identificar el procés de producció i les metodologies de desenvolupament d'un videojoc, així com el paper de cada un dels perfils implicats i les funcions.
CEVJ 11. (ENG) Identificar los modelos de negocio, financiación y monetización propios de la industria del videojuego, así como su distribución digital, seguimiento y marketing.

Transversal:
CT5. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.
CT1a. ENTREPRENEURSHIP AND INNOVATION: Being aware of and understanding how companies are organised and the principles that govern their activity, and being able to understand employment regulations and the relationships between planning, industrial and commercial strategies, quality and profit.
CT2. SUSTAINABILITY AND SOCIAL COMMITMENT: Being aware of and understanding the complexity of the economic and social phenomena typical of a welfare society, and being able to relate social welfare to globalisation and sustainability and to use technique, technology, economics and sustainability in a balanced and compatible manner.

Teaching methodology

The teacher will explain the new content with references and exercises to the students they will have to study and prepare during the following days in order to practice and deeper understand the contents.
The course, apart from the required specific theory, is intended to be rather practical, focusing on the student's learning by doing and understanding the tools to gauge how a business works and students will participate also commenting in the classroom real-life cases.
This is a business driven subject, that needs to be as practical as possible to students understand the need profitability that each game (or product) needs to drive and notions of finance that will be helpful for them in the future.
They will learn which and how the financial reports are required to managing and running a company.
It will be important that students participate during the course in the creation of business plans, investor pitches and budgeting controlling. As the best way of learning will be by doing.
There will be at least 2 practical cases for students to carry on, where the teacher will present the case and students will have to develop it, explain it to the rest of the classroom and others will comment.
Oral presentations will be important as this may take the students away from their comfort zone and forces them to synthesize and summarize information, very important also for their future as entrepreneurs or individual workers.

Learning objectives of the subject

The teacher will explain the new content with references and exercises to the students they will have to study and prepare during the following days in order to practice and deeper understand the contents.
The course, apart from the required specific theory, is intended to be rather practical, focusing on the student's learning by doing and understanding the tools to gauge how a business works and students will participate also commenting in the classroom real-life cases.
