Course guide
820022 - BMTB - Biomaterials

Unit in charge: Barcelona East School of Engineering
Teaching unit: 702 - CEM - Department of Materials Science and Engineering.
Degree: BACHELOR'S DEGREE IN BIOMEDICAL ENGINEERING (Syllabus 2009). (Compulsory subject).
Academic year: 2022 ECTS Credits: 6.0 Languages: Catalan

LECTURER
Coordinating lecturer: DANIEL RODRÍGUEZ RIUS
Others: Rodríguez Rius, Daniel Español Pons, Montserrat Buxadera Palomero, Judit

REQUIREMENTS
BIOMECÀNICA - Prerequisite

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES
Specific:
CEBIO-34. Discern the fundamental criteria that a material must meet before it can be implanted.

CEBIO-250. Identify the fundamental concepts and application principles of biomaterials and apply them to biomedical engineering problems.

Transversal:
1. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

TEACHING METHODOLOGY
The methods employed are:
- 30% presential lessons
- 5% directed presential work (problems)
- 10% laboratory sessions
- 55% self-study

An important component of learning is based on the realization of Lab projects in groups during the course. It includes the preparation and implementation of mechanical testing of biomaterials, programming and processing of the acquired data. It is an activity initially guided, but later the student must develop it independently, based on the knowledge acquired in the course.

LEARNING OBJECTIVES OF THE SUBJECT
Upon completion of the course, the student shall be able to:
- understand the basic requirements of a biomaterial and the basic tests for its characterization.
- understand the fundamental basis and concepts of biomaterial application within biomedical engineering.
- be able to perform experimental testing on biomaterials.
STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours large group</td>
<td>45,0</td>
<td>30.00</td>
</tr>
<tr>
<td>Hours small group</td>
<td>15,0</td>
<td>10.00</td>
</tr>
<tr>
<td>Self study</td>
<td>90,0</td>
<td>60.00</td>
</tr>
</tbody>
</table>

Total learning time: 150 h

CONTENTS

**Definition, classification and properties of biomaterials**

**Description:**
Presentation of the characteristics of biomaterials: what is a biomaterial, how is it classified and what are their most important properties. Description of the main techniques used for biomaterial characterization.

**Specific objectives:**
Definition of Biomaterials.
Classification of biomaterials.
Properties of Biomaterials.

**Related activities:**
Lab practice: activity 1.
Lab practice: activity 2.

**Related competencies:**
07 AAT N3. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

**Full-or-part-time:** 50h
Theory classes: 17h
Laboratory classes: 4h
Self study: 29h

**Biomaterials' behaviour in biological systems**

**Description:**
Study the response of biomaterials implanted in a biological environment, the interaction with tissues and the mechanisms of degradation of implanted biomaterials.

**Specific objectives:**
Properties of materials.
Surface characterization of materials.
Biomaterial-tissue interaction.
Degradation of biomaterials in service.

**Related activities:**
Lab practice: activity 3.

**Full-or-part-time:** 20h
Theory classes: 7h
Laboratory classes: 2h
Self study: 11h
**Definition and evaluation of biocompatibility**

**Description:**
Definition of biocompatibility and description of the techniques used for its evaluation.

**Specific objectives:**
- Definition of Biocompatibility.
- Evaluation of Biocompatibility.

**Related activities:**

**Full-or-part-time:** 14h
- Theory classes: 4h
- Laboratory classes: 2h
- Self study: 8h

**Use of biomaterials in biomedical applications**

**Description:**
A description of the main applications of biomaterials as components to implant in the human body.

**Specific objectives:**
- Biomaterials for hard tissue.
- Biomaterials for soft tissue.
- Biomaterials in contact with the cardiovascular system.

**Related activities:**
- Lab practice: activity 5.

**Full-or-part-time:** 35h
- Theory classes: 12h
- Laboratory classes: 4h
- Self study: 19h

**New trends in biomaterials**

**Description:**
Description of the recent trends in biomaterials research, their aims and future developments.

**Specific objectives:**
Recent trends in biomaterials development.

**Related activities:**
- Lab practice: activity 7.
- Lab practice: activity 8.

**Related competencies:**
07 AAT N3. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

**Full-or-part-time:** 29h
- Theory classes: 9h
- Self study: 20h
GRADING SYSTEM

Partial controls (2): 30%
Final control: 35%
Lab practicum and reports: 35%

Attendance to Lab sessions and seminars is mandatory to pass this subject.
This subject does not include a reevaluation test.

EXAMINATION RULES.

The use of devices with communication capabilities is not allowed.
