Course guides
820037 - BIB - Biomedical Implants

Unit in charge: Barcelona East School of Engineering
Teaching unit: 702 - CEM - Department of Materials Science and Engineering.
Degree: BACHELOR'S DEGREE IN BIOMEDICAL ENGINEERING (Syllabus 2009). (Optional subject).
Academic year: 2021  ECTS Credits: 6.0  Languages: English

LECTURER

Coordinating lecturer: DANIEL RODRÍGUEZ RIOUS
Others: Rodríguez Rius, Daniel

REQUIREMENTS

BIOMATERIALS - Prerequisite
BIOMECCÀNICA - Prerequisite

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
1. Understand biomechanics and biomaterials.

Transversal:
2. THIRD LANGUAGE. Learning a third language, preferably English, to a degree of oral and written fluency that fits in with the future needs of the graduates of each course.
3. TEAMWORK - Level 3. Managing and making work groups effective. Resolving possible conflicts, valuing working with others, assessing the effectiveness of a team and presenting the final results.

TEACHING METHODOLOGY

The course is divided up as follows:
- 30% face-to-face expository classes (theory)
- 15% face-to-face directed classes (problems and seminars)
- 55% self-directed learning (group project and study)

An important component of the course is based on the performance of a group project done through the course. It corresponds to an activity initially oriented by the teacher, but developing afterwards more autonomously, with mentoring support.

LEARNING OBJECTIVES OF THE SUBJECT

After completing the course the student should be able to:
- Understand the principles and concepts of the application of biomedical implants and be able to use them in projects within biomedical engineering.
- Understand the fundamental criteria to be met by a biomedical implant for its use.
STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours small group</td>
<td>15,0</td>
<td>10.00</td>
</tr>
<tr>
<td>Self study</td>
<td>90,0</td>
<td>60.00</td>
</tr>
<tr>
<td>Hours large group</td>
<td>45,0</td>
<td>30.00</td>
</tr>
</tbody>
</table>

Total learning time: 150 h

CONTENTS

**Biomaterials. Types and properties.**

**Description:**
Presentation of the characteristics of biomaterials: what is a biomaterial, how is it classified and what are their most important properties.

**Specific objectives:**
Definition of biomaterial.
Classification of biomaterials.
Properties of biomaterials.

**Full-or-part-time:** 9h
Theory classes: 4h
Self study: 5h

**Biomedical implants. Types and properties.**

**Description:**
Presentation of the characteristics of biomedical implants: how are them defined, classified and what are their most important properties.

**Specific objectives:**
Definition of biomedical implants.
Classification of biomedical implants.
Properties of biomedical implants.

**Full-or-part-time:** 36h
Theory classes: 14h
Laboratory classes: 2h
Self study: 20h
Biological response to biomedical implants.

**Description:**
Study of the biological response and biocompatibility of biomedical implants.

**Specific objectives:**
- Study of the biological response to an implant insertion in the human body.
- Study of the biocompatibility of the biomedical implants.

**Full-or-part-time:** 20h
- Theory classes: 8h
- Laboratory classes: 2h
- Self study: 10h

Design of biomedical implants.

**Description:**
Methodologies and techniques used in the design and calculation of biomedical implants.

**Specific objectives:**
- To understand the main stages of the design flow of biomedical implants.
- To understand the methodologies used for the calculation of biomedical implants.

**Full-or-part-time:** 56h
- Theory classes: 14h
- Laboratory classes: 2h
- Self study: 40h

Legal framework and standards for biomedical implants.

**Description:**
Regulations and legal framework that affects biomedical implants.

**Specific objectives:**
- Understand the legal issues affecting the design, manufacture and use of biomedical implants.

**Full-or-part-time:** 19h 30m
- Theory classes: 8h
- Laboratory classes: 1h 30m
- Self study: 10h

New trends in the development of biomedical implants.

**Description:**
Presentation of the current lines of research in biomedical implants, objectives and future trends of design.

**Specific objectives:**
- To acquire a knowledge of the future trends of design of biomedical implants.

**Full-or-part-time:** 9h 30m
- Theory classes: 4h 30m
- Self study: 5h
GRADING SYSTEM

Partial exams (2): 25%
Final exam: 30%
Problems and participation in seminars: 20%
Group project (Generic competence): 25%
This subject does not include a reevaluation test.

EXAMINATION RULES.

The use of any electronic equipment with wireless communication capabilities is strictly forbidden in the evaluations.
