13963 - ORSA - Optical Remote Sensing I: Active

Coordinating unit: 230 - ETSETB - Barcelona School of Telecommunications Engineering  
Teaching unit: 739 - TSC - Department of Signal Theory and Communications  
Academic year: 2015  
Degree: ERASMUS MUNDUS MASTER'S DEGREE IN RESEARCH ON INFORMATION AND COMMUNICATION TECHNOLOGIES (Syllabus 2009). (Teaching unit Optional)  
MASTER'S DEGREE IN PHOTONICS (Syllabus 2009). (Teaching unit Optional)  
ERASMUS MUNDUS MASTER'S DEGREE IN PHOTONICS ENGINEERING, NANOPHOTONICS AND BIOPHOTONICS (Syllabus 2010). (Teaching unit Optional)  
ECTS credits: 3  
Teaching languages: English

Prior skills

Requirements

Teaching methodology
Oral-exposition classes combined with problems and/or computer-based classes. Review of journal papers or others.

Learning objectives of the subject
To introduce the main techniques, systems and subsystems on laser-radar (LIDAR) remote sensing. The course presents the grounds of the technological, physical, and signal-processing keys involved as well as the applications of these remote sensing systems. Present-day fields of application comprise the detection and monitoring of chemical species, atmospheric observation, pollution concentration and physical variables, and others, in the industrial field.
# 13963 - ORSA - Optical Remote Sensing I: Active

## Content

<table>
<thead>
<tr>
<th>Section</th>
<th>Learning time</th>
<th>Description</th>
</tr>
</thead>
</table>
6. Wind LIDAR Systems

**Learning time:** 4h
- Theory classes: 3h 30m
- Practical classes: 0h 30m

**Description:**

7. Other Laser-Radar Systems

**Learning time:** 2h
- Theory classes: 1h 30m
- Practical classes: 0h 30m

**Description:**
1. DIAL (Differential Absorption Lidar, trace gas detection). 2. Other systems (fluorescence, active vision, etc.)

8. Exam

**Learning time:** 2h
- Theory classes: 2h

9. Project exposition

**Learning time:** 2h
- Theory classes: 2h

**Qualification system**

50 % final exam (multiple answer test), 50 % Guided research work (computer based).

**Regulations for carrying out activities**

A minimum attendance of 80% is required. Exam duration: 2h. Guided research work: Oral exposition or interview (depending on the number of students).

**Bibliography**

6. Wind LIDAR Systems

7. Other Laser-Radar Systems

8. Exam

9. Project exposition

**Learning time:**
- 4h
- 2h
- 2h
- 2h

**Description:**
1. DIAL (Differential Absorption Lidar, trace gas detection). 2. Other systems (fluorescence, active vision, etc.)
