</table>

**Description:**
The aim of this module is to understand how buildings and the space configuration within them support the strategic objectives of the organization. This module covers the best practices for developing and implementing design strategies, defining project requirements and anticipating the changing needs of an organization that could be effected by the building design in the future.

**Related activities:**
- Distance and in-class activities
- Group project
- Individual work
### Module 3: Asset Management

**Learning time:** 16h  
Theory classes: 6h  
Self study: 10h

**Description:**  
The aim of this module is to understand the fundamentals of Asset Management, as much when the company makes large investments in equipment and machinery as when maintaining and operating them in accordance with the own business objectives and the ones of its stakeholders. Both a business vision and technical aspects will be addressed.

**Related activities:**  
Distance and in-class activities  
Group project  
Individual work

### Module 4: Energy management for Facility Managers

**Learning time:** 16h  
Theory classes: 6h  
Self study: 10h

**Description:**  
The aim of this module is to present the tools and techniques to effectively manage energy in a building. Energy efficiency, energy monitoring and management and environmental certification systems will be presented in this module.

**Related activities:**  
Distance and in-class activities  
Group project  
Individual work

### Module 5: Other supporting and integrating technologies

**Learning time:** 11h  
Theory classes: 3h  
Self study: 8h

**Description:**  
The goal of this module is to present different technologies to support and integrate Asset and Facility Management within the organizational structure of the company such as Enterprise Asset Management Systems (EAMS) or Building Information Modelling: O&M phase (BIM).

**Related activities:**  
Distance and in-class activities  
Group project  
Individual work
The final grade depends on the following three elements:

* 20% , Distance and in-class activities
* 40% , Group project
* 40% , Individual work
