**Learning time: 125h**
- Theory classes: 15h
- Laboratory classes: 30h
- Self study: 80h
Continuous assessment:
Continuous assessment will be carried out on the basis of the work to develop by the student during the course through
the delivery of jobs or the realization of written or/and oral tests, according to the criteria and timetable to be established.

Final assessment:
If the results of the continuous assessment are not positive, it will be possible to perform a second evaluation, which will
consist in a global final test that can consist in a written or oral exam or the delivery of jobs, in accordance with the
criterion of the responsible teachers.

Continuous telematic evaluation
In online teaching situations, continuous assessment will be carried out synchronously and asynchronously by the means
established by the University and the School, with a periodic record of academic activity through submissions, forums,
questionnaires or any other means facilitated by the Atena platform, or the alternatives provided to the teaching staff. In
the situations in which this telematic teaching is a product of face-to-face teaching that has already begun, or for
questions of extra-academic order, the changes in the weightings or regular control systems of the teaching will be
communicated in detail to all students by the Athena of each subject.

Telematic final evaluation
If the continuous telematic evaluation is not positive, a second evaluation can be carried out, which will consist of a final
test of a global nature in telematic format that will be established in accordance with the criteria of the professor
responsible and the media and ICTs provided by the University or School.

The measures for adaptation to non-classroom teaching will be implemented in accordance with the criteria of ICT
security and personal data protection to ensure compliance with the legislation on Personal Data Protection (RGPD and
LOPDGDD)
