Description:

Specific objectives:
In this course, relations between architecture and sound will be covered, considering the later as an element of the design of interior and exterior spaces in buildings, both from an energetic understanding and from the point of view of the requirements of the sonorous space. The objective is to establish the acoustic characteristics of architecture in relation to the design of buildings, urban and natural landscapes using the necessary acoustic tools.

Qualification system

<tbody>
<tr>
<td>SE04 Testing and reporting of experimental work</td>
<td>30</td>
</tr>
<tr>
<td>SE09 Individual practical exercises</td>
<td>70</td>
</tr>
</tbody>
</table>

Continuous evaluation throughout the entire course by means of successive evaluation acts:
Field work, in a team (30%)
Individual work proposition (constructive solutions), tutored and assisted (70%)
