Course guide
210909 - H - Hydrology

Unit in charge: Barcelona School of Architecture
Teaching unit: 751 - DECA - Department of Civil and Environmental Engineering.
Degree: MASTER'S DEGREE IN LANDSCAPE ARCHITECTURE (Syllabus 2015). (Compulsory subject).
Academic year: 2022 ECTS Credits: 3.0 Languages: Catalan, Spanish, English

LECTURER

Coordinating lecturer: JOSEP MERCADÉ ALOY
Others: Primer quadrimestre: JOSEP MERCADÉ ALOY - 20

TEACHING METHODOLOGY

A combination of theoretical lessons and workshop studio will be designed, in order to present content to be working out in and out the classroom together with the teachers.

LEARNING OBJECTIVES OF THE SUBJECT

The aim of the subject is to recognize landscape dynamics, forms and processes that frame green infrastructure in large open spaces, intermediate mosaics and the strictly urban environment, in the context of civil and environmental engineering.

STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours small group</td>
<td>9,0</td>
<td>12.00</td>
</tr>
<tr>
<td>Self study</td>
<td>48,0</td>
<td>64.00</td>
</tr>
<tr>
<td>Hours large group</td>
<td>18,0</td>
<td>24.00</td>
</tr>
</tbody>
</table>

Total learning time: 75 h
DESCRIPTION:

01. Introduction to Landscape Engineering
02. Notions of geology: geological materials, rocks and structure of the earth and processes
03. From the geomorphology of the landscape to the geological risks: Dynamics, forms and processes
04. Interpretation of maps and geological profiles
05. Notions of surface and underground hydrology in the framework of the water cycle: free sheet, rain-runoff-propagation, groundwater flow
06. River engineering 1: river morphology, notions of river hydraulics and restoration of river ecosystems
07. River engineering 2: channeling, morphodynamic processes and accessibility
08. Natural water treatment in the framework of environmental engineering: elimination of pollutants, wetlands and lagoon
09. The project of alternative drainage systems: natural drainage, artificial drainage and stormwater management
10. Environmental charges and protective works in the framework of port engineering: waves and maritime climate, vertical facing dams and slopes
11. Longitudinal and transverse transport in the framework of coastal dynamics and coastal engineering: notions of longitudinal dynamics, beach profiles and dune system
12. Landscapes of territorial metabolism
13. Landscape engineering in the landscape planning and management project and processes

FULL-OR-PART-TIME: 65h 20m
Practical classes: 23h 20m
Guided activities: 2h
Self study: 40h

GRADING SYSTEM

In order to evaluate the progress of the students, it is mandatory to present a summary of the field trips. It will also be mandatory to pass a final exam of the subject.

Continuous evaluation

Continuous telematic evaluation
In online teaching situations, continuous assessment will be carried out synchronously and asynchronously by the means established by the University and the School, with a periodic record of academic activity through submissions, forums, questionnaires or any other means facilitated by the Atenea platform, or the alternatives provided to the teaching staff. In the situations in which this telematic teaching is a product of face-to-face teaching that has already begun, or for questions of extra-academic order, the changes in the weightings or regular control systems of the teaching will be communicated in detail to all students by the Athena of each subject.

Telematic final evaluation
If the continuous telematic evaluation is not positive, a second evaluation can be carried out, which will consist of a final test of a global nature in telematic format that will be established in accordance with the criteria of the professor responsible and the media and ICTs provided by the University or School.

The measures for adaptation to non-classroom teaching will be implemented in accordance with the criteria of ICT security and personal data protection to ensure compliance with the legislation on Personal Data Protection (RGPD and LOPDGDD)
