220577 - Energy Technology

**Coordinating unit:** 205 - ESEIAAT - Terrassa School of Industrial, Aerospace and Audiovisual Engineering

**Teaching unit:** 724 - MMT - Department of Heat Engines

**Academic year:** 2018

**Degree:** MASTER'S DEGREE IN MANAGEMENT ENGINEERING (Syllabus 2012). (Teaching unit Optional)

**ECTS credits:** 3  
**Teaching languages:** Catalan

**Teaching staff**

**Coordinator:** Yolanda Calventus Solé

**Others:** Assensi Oliva Llena; Ivette Rodriguez Pérez

**Opening hours**

**Timetable:** It will be available at the beginning of the course

**Prior skills**

Elementary knowledge in Thermodynamics

**Requirements**

Nothing

**Degree competences to which the subject contributes**

**Specific:**

4. Apply theories and principles related to technology and information systems in order to analyze uncertainty complex situations and make decisions using engineering tools.

**Generical:**

1. Ability to apply knowledge to solve problems in new environments or unfamiliar environments within broader contexts (or multidisciplinary) related to engineering.
2. Self-learning capacity to independent continuous training.
3. Ability to understand the impact of engineering solutions in a global and social context.
The course Energy Technology allows students to acquire an enlarged vision of the energy in its sources, transformations and technological applications. At the end of the course students must know several energy sources, alternatives and conventional: solar energy, internal combustion engines, gas turbines, vapor power plants and cogeneration systems.

**Learning objectives of the subject**

The course Energy Technology allows students to acquire an enlarged vision of the energy in its sources, transformations and technological applications. At the end of the course students must know several energy sources, alternatives and conventional: solar energy, internal combustion engines, gas turbines, vapor power plants and cogeneration systems.

# Content

## Module 1: INTRODUCTION TO ENERGY SOURCES. GAS TURBINES POWER PLANTS

**Learning time:** 13h  
Theory classes: 1h  
Guided activities: 2h  
Self study: 10h

### Description:

1.1 Primary energy sources. Interconversions of energy  
1.2 Combustibles: main sources. Fossil fuels. Pollutant emissions  
1.3.- Gas turbines: Application fields. Main parts: compressor, burning chamber and turbine. Parametric analyses of the variables that affect to efficiency and to specific work. Gas turbine modified cycles

### Related activities:

- Activity 1: Large/Theory and exercises group sessions  
- Activity 2: Guided activity  
- Activity 3: Final exam

### Specific objectives:

- To know the main energy sources, the main features of combustibles and its pollutant emissions  
- To know the main features of gas turbines power plants

## Module 2: VAPOR POWER PLANTS AND COMBINED CYCLES

**Learning time:** 13h  
Theory classes: 1h  
Guided activities: 2h  
Self study: 10h

### Description:

3.- Vapor power plants and combined cycles.  
3.1.- Components of a simple vapor power plant. 3.2.- Rankine cycle. Representation in the h-s and T-s diagrams. 3.3.- Principal work and heat transfers. Thermal efficiency. 3.4.- Effect of boiler and condenser pressures on the Rankine cycle. Superheat and reheat. 3.5 Principal irreversibilities and losses 3.6.- Modified Rankine cycles: regenerative vapor power cycle and double expansion with intermediate reheat cycle. 3.7.- Combined cycles.

### Related activities:

- Activity 1: Large/Theory and exercises group sessions  
- Activity 2: Guided activity  
- Activity 3: Final exam

### Specific objectives:

- To know the general operation and main characteristics and operating parameters of power plants with steam turbines and combined cycles.
### Module 3: COMBINED HEAT AND POWER. COGENERATION

#### Learning time: 16h
- Theory classes: 2h
- Guided activities: 4h
- Self study: 10h

#### Description:
- 3.1.- Introduction to the cogeneration.
- 3.2 Main characteristics and areas of application
- 3.3 Trigeneration and microcogeneration
- 3.4 Technologies of cogeneration

#### Related activities:
- Activity 1: Large/Theory and exercises group sessions
- Activity 2: Guided activity
- Activity 3: Final Exam.

#### Specific objectives:
- To know the fundamentals of cogeneration and its purpose as well as its advantages and disadvantages and trigeneration and microcogeneration
- To know the technologies of cogeneration and its advantages and disadvantages

### Módulo 4: Biomass

#### Learning time: 14h
- Theory classes: 2h
- Guided activities: 4h
- Self study: 8h

#### Description:
- 4.1 What is Biomass
- 4.2 Sources of Biomass
- 4.3 Classification of Biomass
- 4.4 Biomass transformation processes

#### Related activities:
- Theory classes
- Final Exam
- Guided activity

#### Specific objectives:
- Learn the fundamental characteristics of biomass and its transformation processes
### Module 5: SOLAR ENERGY AND THERMAL ENERGY STORAGE

**Learning time:** 16h
- Theory classes: 2h
- Guided activities: 4h
- Self study: 10h

**Description:**

**Related activities:**
- Activity 1: Large/Theory and exercises group sessions
- Activity 2: Guided activity
- Activity 3: Final Exam.

**Specific objectives:**
To know the possibilities and techniques for taking advantage of solar thermal energy in buildings.
### Planning of activities

<table>
<thead>
<tr>
<th>ACTIVITY 1: THEORY AND EXERCISES/ LARGE GROUPS SESSIONS</th>
<th>Hours: 34h</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Description:</strong> Methodology in large group</td>
<td>Theory classes: 8h</td>
</tr>
<tr>
<td>Contains are presented following an expositive and participative class</td>
<td>Self study: 26h</td>
</tr>
<tr>
<td>The subject is organized in 5 modules</td>
<td></td>
</tr>
</tbody>
</table>

| **Support materials:** |
| Noted posted to the ATENEA platform |
| General literature of the course. |

| **Descriptions of the assignments due and their relation to the assessment:** |
| During some sessions, exercises will be conducted in the class, individually. |

| **Specific objectives:** |
| Transfer the necessary knowledge for a correct interpretation of the contents in the large group sessions, resolving doubts about the content of the course and generic skills development. |

<table>
<thead>
<tr>
<th>ACTIVITY 2: GUIDED ACTIVITIES SESSION</th>
<th>Hours: 32h</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Description:</strong> Students in groups will select, in agreement with professors, a report title that should develop from a list proposed by professors. This report must follow an scheme which will be discussed and fixed conveniently by professors.</td>
<td></td>
</tr>
</tbody>
</table>

| **Support materials:** |
| Noted posted to the ATENEA platform. |
| Specific material uploaded by professors in Atenea Platform |
| Bibliography |

| **Descriptions of the assignments due and their relation to the assessment:** |
| Students will upload a report memory in Atenea Platform |
| It represents 50% of the final course grade |

| **Specific objectives:** |
| Acquire the necessary skills for the corrected correct achievement of the subject objectives. |

<table>
<thead>
<tr>
<th>ACTIVITY 3: FINAL EXAM</th>
<th>Hours: 6h</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Description:</strong></td>
<td>Theory classes: 2h</td>
</tr>
<tr>
<td>Hours: 6h</td>
<td>Self study: 4h</td>
</tr>
</tbody>
</table>
The final grade depends on the following assessment criteria:

- Final Exam, weight: 50%
- Guided activity, weight: 50%

Students that fail or do not present the final exam have the possibility to repeat it.

**Qualification system**

The final grade depends on the following assessment criteria:

- Final Exam, weight: 50%
- Guided activity, weight: 50%

The hand-in will be the result of the exam.

This activity represents 50% of the final course grade.

It represents 45% of the final course grade.

**Description:**
Individual and writing assessment about the contents of modules 1, 2, 3, 4 and 5.

**Support materials:**
Instructions and terms for the final exam.

**Descriptions of the assignments due and their relation to the assessment:**
The hand-in will be the result of the exam.
This activity represents 50% of the final course grade.
It represents 45% of the final course grade.

**Specific objectives:**
The exam must demonstrate that the student has acquired and assimilated the concepts, principles and fundamentals related to modules 1, 2, 3, 4 and 5.

**Regulations for carrying out activities**

Guided activities and final exam will be written.
