### Degree competences to which the subject contributes

Generical:

1. Ability to integrate knowledge and formulate judgments with the aim of making decisions based on information that, with incomplete or limited include reflecting on social and ethical responsibilities linked to the application of their knowledge and judgments.

### Teaching methodology

The course is divided into three parts:

Theory classes

Practical classes

Self-study for doing exercises and activities.

In the theory classes, teachers will introduce the theoretical basis of the concepts, methods and results and illustrate them with examples appropriate to facilitate their understanding.

In the practical classes (in the classroom), teachers guide students in applying theoretical concepts to solve problems, always using critical reasoning. We propose that students solve exercises in and outside the classroom, to promote contact and use the basic tools needed to solve problems.

Students, independently, need to work on the materials provided by teachers and the outcomes of the sessions of exercises/problems, in order to fix and assimilate the concepts.

The teachers provide the curriculum and monitoring of activities (by ATENEA).

### Learning objectives of the subject

Introduction of the student to the world of the right, taking into account that this will be one of the few signatures, not to say the only, that has juridical contents. It pretends that the student have a prisoner of contact with the branches of the Law that can be important in the world of the company, no with the spirit of that it can resolve the possible conflicts that arise, sino with the spirit of that it know to identify them and decide the type of assessoria legal that needs.
