Teaching methodology
The teaching methodology is divided into three parts:
1. Face sessions: Work Group.
2. Blended Activities: practical work in groups
In the face-to-face sessions, students will learn the basic use of management tools for research through group activities. The lecturer will guide the students during the concepts application. The lecturer will encourage students' participation. You need to bring your laptop to perform the classroom tasks.
In the blended activities, students will work in the same class group to carry out the proposed activities for managing tools similar to those used during the classroom sessions. These activities try to ensure the achievement of the basic use of these other tools for research.
The lecturer will provide the syllabus through Athena and invigorate the course activities. To monitor the blended activities the lecturer will use another external online platform.
