230552 - BUSINE - Business and Patents in Photonics

Coordinating unit: 230 - ETSETB - Barcelona School of Telecommunications Engineering
Teaching unit: 731 - OO - Department of Optics and Optometry
Academic year: 2018
Degree: MASTER'S DEGREE IN PHOTONICS (Syllabus 2013). (Teaching unit Compulsory)
ERASMUS MUNDUS MASTER'S DEGREE IN PHOTONICS ENGINEERING, NANOPHOTONICS AND BIOPHOTONICS (Syllabus 2010). (Teaching unit Optional)
ECTS credits: 5
Teaching languages: English

Teaching staff
Coordinator: Santiago Royo (UPC, coord.)
Others: Carles Puente (UPC)

Opening hours
Timetable: royoo@oo.upc.edu
carles.puente@upc.edu

Degree competences to which the subject contributes

Basic:
CB8. (ENG) Que los estudiantes sean capaces de integrar conocimientos y enfrentarse a la complejidad de formular juicios a partir de una información que, siendo incompleta o limitada, incluya reflexiones sobre las responsabilidades sociales y éticas vinculadas a la aplicación de sus conocimientos y juicio.
CB9. (ENG) Que los estudiantes sepan comunicar sus conclusiones y los conocimientos y razones últimas que las sustentan a públicos especializados y no especializados de un modo claro y sin ambigüedades

Specific:
CE7. (ENG) Máster en Fotónica:
Capacidad de entender la ingeniería óptica como una actividad económica y empresarial considerando, entre otros, aspectos sociales, éticos y de sostenibilidad
CE8. (ENG) Máster en Fotónica:
Comprender la importancia de las patentes como base de la empresa tecnológica y tener la capacidad para entender y redactar una patente en el ámbito de la fotónica

Generical:
CG1. (ENG) Máster en Fotónica:
Capacidad para proyectar, diseñar e implantar productos, procesos, servicios e instalaciones en algunos ámbitos de la fotónica como los relacionados con la ingeniería fotónica, la nanofotónica, la óptica cuántica, las telecomunicaciones y la biofotónica
CG3. (ENG) Máster en Fotónica:
Capacidad para la dirección técnica y dirección de proyectos de investigación, desarrollo e innovación, en centros de investigación, empresas y centros tecnológicos, en el ámbito de la Fotónica

Transversal:
1. EFFECTIVE USE OF INFORMATION RESOURCES: Managing the acquisition, structuring, analysis and display of data and information in the chosen area of specialisation and critically assessing the results obtained.
3. ENTREPRENEURSHIP AND INNOVATION: Being aware of and understanding how companies are organised and the principles that govern their activity, and being able to understand employment regulations and the relationships between planning, industrial and commercial strategies, quality and profit.
2. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.
The purpose of this course is to provide the students with the fundamental entrepreneurial and management skills required to successfully start and develop a technology-based business. Special attention is paid to train engineers and scientists who are interested in the practical use of photonics technology in the development of photonic inventions and innovations, including their intellectual property rights protection through patents.

The second purpose is to incite business awareness and to explore how scientific and technical concepts might be translated into real-life industrial applications.

Program will include lectures given by entrepreneurs that have the experience of starting-up a spin-off company. Participants will be also exposed to a highly interactive process of analysis and discussion, including case studies and small-group learning activities, such as the analysis of a business opportunity. Fundamental concepts on the effective writing and use of patents in business will be also discussed through several examples of photonic patents and company cases that have effectively used patents to leverage a successful technology-based business.

Content

1. Business in Photonics

Description:
1.1. Entrepreneurship and Intrapreneurship.
1.3. Organization of a technology based company.
1.4. Strategic and Product Marketing
1.5. Photonics Business and Photonics Clusters.
1.6. Basic of Start-up Finance and Accounting.

Learning time: 18h 45m
Theory classes: 18h 45m

2. Patents in Photonics

Description:
2.1. Innovation and Entrepreneurship. An Intellectual Property based Economy.

Learning time: 18h 45m
Theory classes: 18h 45m
Planning of activities

<table>
<thead>
<tr>
<th>Market Place</th>
<th>Hours: 1h</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Theory classes: 1h</td>
</tr>
</tbody>
</table>

Description:
By half of the course a marketplace session will be organized. In this session the participants will submit ideas that could become potential business opportunities. During this session participants will team up to form working groups.

<table>
<thead>
<tr>
<th>Presentation of a Photonics-related business</th>
<th>Hours: 2h 48m</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Theory classes: 2h 48m</td>
</tr>
</tbody>
</table>

Description:
At the end of the course, during the week of special activities, the working groups will make a presentation of the photonics-related business that they have analyzed along the course in a simulated environment in which Venture Capitalists are seeking for good investing opportunities.

Qualification system

-As an Individual:
  Weekly Assignments, participation in lectures, workshops and case studies (15%)
  Short final Exam (15%)

-As a Team:
  Course Project: Opportunity Analysis in Photonics (35%)
  Course Project: Patent Writing in Photonics (35%)
