Course guide
230624 - BIOM - Biometrics

Unit in charge: Barcelona School of Telecommunications Engineering
Teaching unit: 739 - TSC - Department of Signal Theory and Communications.
Degree: MASTER'S DEGREE IN TELECOMMUNICATIONS ENGINEERING (Syllabus 2013). (Optional subject).
MASTER'S DEGREE IN ADVANCED TELECOMMUNICATION TECHNOLOGIES (Syllabus 2019). (Optional subject).
Academic year: 2022 ECTS Credits: 5.0 Languages: English

LECTURER
Coordinating lecturer: Consultar aquí / See here: https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/responsables-assignatura
Others: Consultar aquí / See here: https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/professorat-assignat-idioma

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
1. Ability to apply information theory methods, adaptive modulation and channel coding, as well as advanced techniques of digital signal processing to communication and audiovisual systems.

Transversal:
2. EFFECTIVE USE OF INFORMATION RESOURCES: Managing the acquisition, structuring, analysis and display of data and information in the chosen area of specialisation and critically assessing the results obtained.
3. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.

TEACHING METHODOLOGY
- Lectures
- Individual work (distance)
- Oral presentations
- Extended answer tests

LEARNING OBJECTIVES OF THE SUBJECT

In this course principles and methods of biometric systems will be presented to the student. The course will also cover the state-of-the-art techniques in audio, image and video technologies, including Deep Learning.
STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours large group</td>
<td>39,0</td>
<td>31.20</td>
</tr>
<tr>
<td>Self study</td>
<td>86,0</td>
<td>68.80</td>
</tr>
</tbody>
</table>

Total learning time: 125 h

CONTENTS

1. Introduction

Description:
- Definitions, examples, applications

Full-or-part-time: 4h
Theory classes: 2h
Self study: 2h

2. System Architecture and Assessment

Description:
- System architecture: features, classifiers
- Performance criteria

Full-or-part-time: 9h
Theory classes: 3h
Self study: 6h

3. Face recognition

Description:
- Face detection
- Face recognition

Full-or-part-time: 18h
Theory classes: 6h
Self study: 12h

4. Fingerprint recognition

Description:

Full-or-part-time: 9h
Theory classes: 3h
Self study: 6h
## 5. Iris recognition

**Description:**

**Full-or-part-time:** 9h  
Theory classes: 3h  
Self study : 6h

## 6. Speaker recognition

**Description:**  
- Identification and verification  
- Diarization

**Full-or-part-time:** 18h  
Theory classes: 6h  
Self study : 12h

## 7. Other biometrics

**Description:**  
- Signature  
- Hand geometry  
- Keystroke  
- Others

**Full-or-part-time:** 44h 40m  
Theory classes: 8h 40m  
Self study : 36h

## 8. Multimodal biometrics

**Description:**  
- Fusion levels  
- Normalization and fusion

**Full-or-part-time:** 8h  
Theory classes: 2h  
Self study : 6h
### ACTIVITIES

#### Partial control

**Related competencies:**
CE1. Ability to apply information theory methods, adaptive modulation and channel coding, as well as advanced techniques of digital signal processing to communication and audiovisual systems.
CTS. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.

**Full-or-part-time:** 2h
Theory classes: 2h

---

#### Oral presentation of individual work

**Related competencies:**
CT4. EFFECTIVE USE OF INFORMATION RESOURCES: Managing the acquisition, structuring, analysis and display of data and information in the chosen area of specialisation and critically assessing the results obtained.
CTS. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.

**Full-or-part-time:** 0h 20m
Theory classes: 0h 20m

---

#### Final exam

**Description:**
Final examination.

**Related competencies:**
CE1. Ability to apply information theory methods, adaptive modulation and channel coding, as well as advanced techniques of digital signal processing to communication and audiovisual systems.
CTS. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.

**Full-or-part-time:** 3h
Theory classes: 3h
GRADING SYSTEM

If the mark of partial exam is higher than 5, and the average mark of the partial exam, the assignment and the practices is higher than 7, the final exam will not include the partial exam contents and:

Partial exam 1: 25%
Assignment: 25%
Practices: 25%
Final exam: 25%

Otherwise, the final exam will include the partial exam contents and

Assignment: 25%
Practices: 25%
Final exam: 50%
