Course guides
250706 - 250706 - Structural Analysis Seminars

Unit in charge: Barcelona School of Civil Engineering
Teaching unit: 751 - DECA - Department of Civil and Environmental Engineering.
Degree: MASTER'S DEGREE IN STRUCTURAL AND CONSTRUCTION ENGINEERING (Syllabus 2015). (Optional subject).
Academic year: 2020
ECTS Credits: 2.5
Languages: English

LECTURER

Coordinating lecturer: LUIS MIGUEL CERVERA RUIZ
Others: LUIS MIGUEL CERVERA RUIZ, NARGES DIALAMISHABANKAREH

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Generical:
13360. To conceive, design, analyze and manage structures or structural elements of civil engineering or building, encouraging innovation and the advance of knowledge.
13361. To develop, improve and use conventional materials and new construction techniques to ensure the safety requirements, functionality, durability and sustainability.

TEACHING METHODOLOGY

The course consists of 0,8 hours per week of classroom activity (large size group).

The 0,8 hours in the large size groups are devoted to theoretical lectures, in which the teacher presents the basic concepts and topics of the subject, shows examples and solves exercises.

Support material in the form of a detailed teaching plan is provided using the virtual campus ATENEA: content, program of learning and assessment activities conducted and literature.

LEARNING OBJECTIVES OF THE SUBJECT

Subject to acquire knowledge on trends in research related to structural analysis

Capability to acquire the latest knowledge on research issues related to structural analysis

Recent advances in research topics related to structural analysis

This course aims to give an overview about the possibilities offered by numerical simulation in the structural analysis. The student will be able to exercise in different aspects of the structural calculation. All the necessary knowledge will be reviewed and appropriate calculation tools (software, interfaces, etc.) will be provided.

Total learning time: 62.4 h

CONTENTS

Introduction

Description:
Introduction: course objectives, the format of the lessons, tasks

Full-or-part-time: 2h 24m
- Theory classes: 1h
- Self study: 1h 24m

Geometric modeling and meshing

Description:
- Software Introduction
- Tutorial geometric modeling
- Tutorial discretization

Full-or-part-time: 13h 12m
- Laboratory classes: 5h 30m
- Self study: 7h 42m

Solid Mechanics

Description:
- Stresses and strains
- Elasticity and elastic problem

Full-or-part-time: 12h
- Laboratory classes: 5h
- Self study: 7h

Structural analysis

Description:
- Static analysis 2D and 3D

Full-or-part-time: 12h
- Laboratory classes: 5h
- Self study: 7h
Dynamic Analysis

Description:
Dynamic analysis of structures in bars and continue on.

Full-or-part-time: 12h
Laboratory classes: 5h
Self study: 7h

GRADING SYSTEM

Continuous assessment consists of different activities, both individual and group formative in nature, made during the course (in the classroom and outside it). Assessment tests consist of a set of application exercises according to the themes developed in the course. The rating is calculated as an average of the work done throughout the course.

EXAMINATION RULES.

Failure to perform a laboratory or continuous assessment activity in the scheduled period will result in a mark of zero in that activity.
