Course guides

250729 - 250729 - Safety and Health in Construction

Unit in charge: Barcelona School of Civil Engineering
Teaching unit: 751 - DECA - Department of Civil and Environmental Engineering.

Degree: MASTER'S DEGREE IN STRUCTURAL AND CONSTRUCTION ENGINEERING (Syllabus 2015). (Optional subject).

Academic year: 2020  ECTS Credits: 5.0  Languages: Spanish

LECTURER

Coordinating lecturer: GONZALO RAMOS SCHNEIDER
Others: GONZALO RAMOS SCHNEIDER, IGNACIO VALERO LOPEZ

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
13367. To apply innovative and sustainable technological aspects in the management and implementation of projects and works.
13370. To analyze the multiple technical and legal conditions arising in the construction of public works, and use proven methods and proven technologies with the aim of achieving greater efficiency in construction while respecting the environment and protecting the safety and health of workers and users of public works.

General:
13360. To conceive, design, analyze and manage structures or structural elements of civil engineering or building, encouraging innovation and the advance of knowledge.
13361. To develop, improve and use conventional materials and new construction techniques to ensure the safety requirements, functionality, durability and sustainability.
13362. To define construction processes and methods of organization and management of projects and works.
13363. To design plans for safety, quality and environmental and socioeconomic impacts related to the construction process.

TEACHING METHODOLOGY

Master classes with the development of course work and the completion of one or two visits to combine works. Therefore there is much work in the classroom and personal work outside the classroom. The material is available in Athena

LEARNING OBJECTIVES OF THE SUBJECT

Subject to prepare students to be able to manage a construction site considering risk prevention and working conditions

- Capability to take into account the aspects related to occupational risk prevention and working conditions in the workplace

Total learning time: 125.1 h

CONTENTS

Master Classes

Description:
- Introduction to safety and health in construction
- Regulations and Legislation
- Health and Safety Study
- Study Safety and Health 2
- Safety Plan and Health 1
- Plan Safety and Health 2
- Individual protections
- Collective Protections
- Disciplines of Occupational Risks
- Urban Resilience
- Course work
- Site visit

Full-or-part-time: 93h 36m
- Theory classes: 20h
- Laboratory classes: 19h
- Self study: 54h 36m

GRADING SYSTEM

The course grade is obtained from the performance of course work (50 %) and examination (50 %)

EXAMINATION RULES.

If the test is not performed or work can not be overcome the subject
