Course guide
270516 - MEEGQ - Efqm and Quality Management

Last modified: 12/07/2022

Unit in charge: Barcelona School of Informatics
Teaching unit: 715 - EIO - Department of Statistics and Operations Research.

Degree: MASTER’S DEGREE IN INFORMATICS ENGINEERING (Syllabus 2012). (Optional subject).
Academic year: 2022  ECTS Credits: 1.5  Languages: Catalan, Spanish

LECTURER
Coordinating lecturer: PAU FONSECA CASAS
Others:
Primer quadrimestre:
JOAN GARCIA SUBIRANA - 10

PRIOR SKILLS

Follow the course requires no prior specific capacities, the course is self contained.

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
CDG2. Capacity for strategic planning, development, direction, coordination, and technical and economic management in the areas of Informatics Engineering related to: systems, applications, services, networks, infrastructure or computer facilities and software development centers or factories, respecting the implementation of quality and environmental criteria in multidisciplinary working environments.
CTE3. Capability to secure, manage, audit and certify the quality of developments, processes, systems, services, applications and software products.
CTE4. Capability to design, develop, manage and evaluate mechanisms of certification and safety guarantee in the management and access to information in a local or distributed processing.

Generical:
CG5. Capacity for the development, strategic planning, leadership, coordination and technical and financial management of projects in all areas of Informatics Engineering, keeping up with quality and environmental criteria.
CG9. Capacity to understand and apply ethical responsibility, law and professional deontology of the activity of the Informatics Engineering profession.

Transversal:
CTR1. ENTREPRENEURSHIP AND INNOVATION: Capacity for knowing and understanding a business organization and the science that rules its activity, capability to understand the labour rules and the relationships between planning, industrial and commercial strategies, quality and profit. Capacity for developing creativity, entrepreneurship and innovation trend.
CTR2. SUSTAINABILITY AND SOCIAL COMMITMENT: Capability to know and understand the complexity of the typical economic and social phenomena of the welfare society. Capacity for being able to analyze and assess the social and environmental impact.

TEACHING METHODOLOGY

The course is practical and encourage the delivery of coursework by the students during the course.

LEARNING OBJECTIVES OF THE SUBJECT

1. Understanding the EFQM model and be able to use it in a specific business environment.
2. Understanding the relationship of the EFQM model with the sustainability in a specific business area.
## STUDY LOAD

<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours large group</td>
<td>13,5</td>
<td>36.00</td>
</tr>
<tr>
<td>Self study</td>
<td>24,0</td>
<td>64.00</td>
</tr>
</tbody>
</table>

**Total learning time:** 37.5 h

## CONTENTS

### The EFQM model

**Description:**
Introduction of the EFQM model.

### Sustainability

**Description:**
Explanation of the basic concepts of sustainability and its relationship with the EFQM model.

## ACTIVITIES

### Explanation of the EFQM model

**Specific objectives:**
1

**Related competencies:**
- CG9. Capacity to understand and apply ethical responsibility, law and professional deontology of the activity of the Informatics Engineering profession.
- CG5. Capacity for the development, strategic planning, leadership, coordination and technical and financial management of projects in all areas of Informatics Engineering, keeping up with quality and environmental criteria.
- CTE4. Capability to design, develop, manage and evaluate mechanisms of certification and safety guarantee in the management and access to information in a local or distributed processing.
- CDG2. Capacity for strategic planning, development, direction, coordination, and technical and economic management in the areas of Informatics Engineering related to: systems, applications, services, networks, infrastructure or computer facilities and software development centers or factories, respecting the implementation of quality and environmental criteria in multidisciplinary working environments.
- CTE3. Capability to secure, manage, audit and certify the quality of developments, processes, systems, services, applications and software products.
- CTR1. ENTREPRENEURSHIP AND INNOVATION: Capacity for knowing and understanding a business organization and the science that rules its activity, capability to understand the labour rules and the relationships between planning, industrial and commercial strategies, quality and profit. Capacity for developing creativity, entrepreneurship and innovation trend.

**Full-or-part-time:** 12h 18m
- Theory classes: 6h
- Laboratory classes: 6h 18m
### Sustainability

**Specific objectives:**

2

**Related competencies:**

CTR2. SUSTAINABILITY AND SOCIAL COMMITMENT: Capability to know and understand the complexity of the typical economic and social phenomena of the welfare society. Capacity for being able to analyze and assess the social and environmental impact.

**Full-or-part-time:** 1h

Theory classes: 1h

### Coursework

**Specific objectives:**

1, 2

**Related competencies:**

CG9. Capacity to understand and apply ethical responsibility, law and professional deontology of the activity of the Informatics Engineering profession.

CG5. Capacity for the development, strategic planning, leadership, coordination and technical and financial management of projects in all areas of Informatics Engineering, keeping up with quality and environmental criteria.

CTE4. Capability to design, develop, manage and evaluate mechanisms of certification and safety guarantee in the management and access to information in a local or distributed processing.

CDG2. Capacity for strategic planning, development, direction, coordination, and technical and economic management in the areas of Informatics Engineering related to: systems, applications, services, networks, infrastructure or computer facilities and software development centers or factories, respecting the implementation of quality and environmental criteria in multidisciplinary working environments.

CTE3. Capability to secure, manage, audit and certify the quality of developments, processes, systems, services, applications and software products.

CTR1. ENTREPRENEURSHIP AND INNOVATION: Capacity for knowing and understanding a business organization and the science that rules its activity, capability to understand the labour rules and the relationships between planning, industrial and commercial strategies, quality and profit. Capacity for developing creativity, entrepreneurship and innovation trend.

CTR2. SUSTAINABILITY AND SOCIAL COMMITMENT: Capability to know and understand the complexity of the typical economic and social phenomena of the welfare society. Capacity for being able to analyze and assess the social and environmental impact.

**Full-or-part-time:** 21h

Self study: 21h
