310504 - Integrated Management Prl, Q & Ma

Coordinating unit: 310 - EPSEB - Barcelona School of Building Construction
Teaching unit: 732 - OE - Department of Management
753 - TA - Department of Architectural Technology

Academic year: 2018
Degree: MASTER'S DEGREE IN BUILDING CONSTRUCTION MANAGEMENT (Syllabus 2015). (Teaching unit Compulsory)
ECTS credits: 5
Teaching languages: Spanish

Teaching staff
Coordinator: Gaspar Fàbregas, Kàtia
Others: Abad Puente, Jesus

Degree competences to which the subject contributes

Basic:
- CB7. The students must be able to apply the acquired knowledges and their ability of resolution of problems in new or little known environments inside more wide environments (or multidisciplinary) related with their study field.

Specific:
- CE04MUGE. Apply audit techniques to construction processes, in the areas of quality, safety and environment.
- CE05MUGE. Implement management models of resources in companies in the sector of construction
- CE10MUGE. Design indicator systems for building processes.
- CE12MUGE. Apply management models suitable for edification processes
- CE13MUGE. Implement standardized systems of integrated management (quality, safety and environment)

General:
- CG4MUGE. Analyse, evaluate and synthesise critically, the information to propose solutions or alternatives to situations arising from building management processes.

Transversal:
- 05 TEQ. TEAMWORK. Being able to work as a team player, either as a member or as a leader. Contributing to projects pragmatically and responsibly, by reaching commitments in accordance to the resources that are available.

Teaching methodology

The subject Gestió Integrada PRL, Q i MA tries to create narrow links between the theoretical knowledge and the practical application throughout the different class sessions (2 weekly hours). Under this concept, the implication of the student in the theoretical and practical sessions is fundamental to ensure an enough learning process.

Learning objectives of the subject

At the end of the course students must be able to:
- Design an integrated management system based on international standards
- Conduct audits of management systems
- Develop systems of indicators that help to improve continuously processes and management systems of the
### Study load

</table>

**Description:**
In this content the students will see:

1.1 Current Management Principles
1.2 Management based on processes
1.3 The continuous improvement
1.4 Orientation towards the achievement of objectives
1.5 Standardized management systems and certification processes

<table>

</tbody>
</table>

**Description:**
In this content the students will see:

3.1 Sustainability in building
3.2 Management of environmental aspects in building
3.3 Models of environmental management
The evaluation of the student’s achievement will be done considering these parameters:

Final mark = (0.60 x CC) + (0.40 x EF)

Being:

Short practical cases (in-person) (CC): 60%
Final Exam (EF): 40%
