310508 - Geographic Information Systems Applied to Urban Planning and Building (Gis and Bim)

Coordinating unit: 310 - EPSEB - Barcelona School of Building Construction
Teaching unit: 752 - RA - Departamento de Representación Arquitectónica
751 - DECA - Department of Civil and Environmental Engineering

Academic year: 2018
Degree: MASTER'S DEGREE IN BUILDING CONSTRUCTION MANAGEMENT (Syllabus 2015). (Teaching unit Optional)
ECTS credits: 5
Teaching languages: Spanish

Teaching staff
Coordinator: Nuñez Andres, M Amparo
Others: Sanz Conde, M. Mercedes
Regot Marimon, Joaquin Manuel
Nuñez Andres, Maria Amparo

Degree competences to which the subject contributes

Basic:
CB7. The students must be able to apply the acquired knowledges and their ability of resolution of problems in new or little known environments inside more wide environments (or multidisciplinary) related with their study field.

Specific:
CE02MUGE. Apply information systems in the company.
CE12MUGE. Apply management models suitable for edification processes

General:
CG1MUGE. Apply the acquired knowledge in solving complex problems in any sector of the building management.
CG2MUGE. Manage projects in the field of construction.

Transversal:
06 URI. EFFECTIVE USE OF INFORMATION RESOURCES. Managing the acquisition, structure, analysis and display of information from the own field of specialization. Taking a critical stance with regard to the results obtained.

Teaching methodology
Master class.
Expository/participative class.
Practices.

Learning objectives of the subject

- Modelling of the reality by SIG.
- Know the SIG analysis tools.
- Know the principles of the BIM methodology.
- Understand the BIM processes and the benefits derived from the use of the BIM management.
- Acquire the ability to apply BIM in all the life cycle of the building.
- Be able to design a bussiness model through BIM.
### Study load

<table>
<thead>
<tr>
<th>Study load</th>
<th>125h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total learning time:</td>
<td>125h</td>
</tr>
<tr>
<td>Hours large group:</td>
<td>15h 12.00%</td>
</tr>
<tr>
<td>Hours medium group:</td>
<td>5h 4.00%</td>
</tr>
<tr>
<td>Hours small group:</td>
<td>5h 4.00%</td>
</tr>
<tr>
<td>Guided activities:</td>
<td>10h 8.00%</td>
</tr>
<tr>
<td>Self study:</td>
<td>90h 72.00%</td>
</tr>
</tbody>
</table>
## Content

<table>
<thead>
<tr>
<th>title english</th>
<th>Learning time: 4h</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Theory classes: 2h</td>
</tr>
<tr>
<td></td>
<td>Self study: 2h</td>
</tr>
</tbody>
</table>

**Description:**
Introduction to SIG.

**Related activities:**
Activity 1.

**Specific objectives:**
Topic of introduction to the subject. Past, present and future of the SIG.

<table>
<thead>
<tr>
<th>title english</th>
<th>Learning time: 8h</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Theory classes: 1h</td>
</tr>
<tr>
<td></td>
<td>Guided activities: 1h</td>
</tr>
<tr>
<td></td>
<td>Self study: 6h</td>
</tr>
</tbody>
</table>

**Description:**
- Data sources.
- Types: raster, vector.
- Quality.
- Metadata.

**Related activities:**
Activity 2.

**Specific objectives:**
Know the different spatial data sources and its treatment inside a SIG.
Know and apply the quality control parameters of the spatial data and creation of metadata.
### 310508 - Geographic Information Systems Applied to Urban Planning and Building (Gis and Bim)

<table>
<thead>
<tr>
<th>title english</th>
<th>Learning time: 32h 30m</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Theory classes: 1h 30m</td>
</tr>
<tr>
<td></td>
<td>Laboratory classes: 1h</td>
</tr>
<tr>
<td></td>
<td>Self study : 30h</td>
</tr>
</tbody>
</table>

**Description:**
- Types of spatial analysis in a SIG.
- Spatial relations. Topology.
- Questions and operations with data bases.
- Basic analytical operations in a vector SIG.
- Applications.

**Related activities:**
Activity 3.

**Specific objectives:**
- Know and apply the basic tools of enquiry and analysis of a SIG for vector data.

### Learning time: 33h 30m

<table>
<thead>
<tr>
<th></th>
<th>Theory classes: 3h 30m</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Guided activities: 5h</td>
</tr>
<tr>
<td></td>
<td>Self study : 25h</td>
</tr>
</tbody>
</table>

**Description:**
- The work with objects.
- Organisation of work in BIM.
- Hierarchy, types and families.
- Data management and file transfer.

**Related activities:**
Activities 4 and 5.

**Specific objectives:**
- Know the principles of the BIM methodology.
- Understand the BIM processes and the benefits derivated from the use of the BIM management.
- Acquire the ability to apply BIM to all the cycle of life of the building.
- Be able to design a business model through BIM.
### Planning of activities

<table>
<thead>
<tr>

<tr>
<td></td>
<td>5h</td>
</tr>
<tr>
<td></td>
<td>9h</td>
</tr>
<tr>
<td></td>
<td>14h</td>
</tr>
<tr>
<td></td>
<td>12h</td>
</tr>
</tbody>
</table>

#### Specific objectives:
- Work with the software ArcGIS with municipal cartography.
- Introduction and management of graphical and alphanumeric data of different sources.
- Work with open data of urban management.
- Learning of the tools for vector analysis.
- Numerical, metric and positional control of objects in BIM.

#### Descriptions of the assignments due and their relation to the assessment:
- Report of the practice.
- Analysis of a building and data management. Report of the work.
310508 - Geographic Information Systems Applied to Urban Planning and Building (Gis and Bim)

**Description:**
Volumetric modelling of data management.

**Descriptions of the assignments due and their relation to the assessment:**
Report of the work.

**Qualification system**

The student will be evaluated by the fulfilment of the individual deliverable practices

**Bibliography**

**Basic:**
