TEACHING METHODOLOGY

Presencial Teaching + activities

LEARNING OBJECTIVES OF THE SUBJECT

The main aim of this course is to develop participants' ability to express themselves in English, both orally and in writing, on subjects related to the contents of the MSc in Photonics as a whole. It is envisaged that participants will primarily want:
· to gain confidence and oral fluency, especially when speaking in public;
· to be able to write sort of texts most commonly needed in an academic environment (abstracts, reports, posters, summaries, etc.).
For this reason, much of the course will involve the active participation of the students. However, it may also include an element of listening comprehension as well as the grammar necessary to improve participants' productive skills.

CONTENTS

- Presentation skills

- Writing skills

- Grammar and vocabulary

GRADING SYSTEM

· attendance and participation;
· weekly written assignments;
· oral presentations throughout the course;
· a short final written project
