32058 - MM - Mathematical Methods

Coordinator: PEDRO TALAVERA SANCHEZ

Teaching methodology

Presencial teaching + activities

Learning objectives of the subject

Concepts and uses of special functions, solutions of differential eqs. Variational methods, perturbation theory, infinite dimensional vector space and tensors. Prior knowledge of algebra and analysis is assumed.
### Content

<table>
<thead>
<tr>
<th>Topic</th>
<th>Degree competences to which the content contributes:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Vectors, matrices and coordinates</td>
<td></td>
</tr>
<tr>
<td>- Complex functions</td>
<td></td>
</tr>
<tr>
<td>- Linear differential eqs. of second order</td>
<td></td>
</tr>
<tr>
<td>- Fourier Series</td>
<td></td>
</tr>
<tr>
<td>- Laplace transformation</td>
<td></td>
</tr>
<tr>
<td>- Theory of distribution</td>
<td></td>
</tr>
<tr>
<td>- Fourier transforms</td>
<td></td>
</tr>
<tr>
<td>- Partial differential eqs.</td>
<td></td>
</tr>
<tr>
<td>- Special functions</td>
<td></td>
</tr>

**- Infinite dimensional vector spaces**

Degree competences to which the content contributes:

**- Green’s function**

Degree competences to which the content contributes:

**- Variational methods**

Degree competences to which the content contributes:

**- Perturbation methods**

Degree competences to which the content contributes:

---

**Qualification system**

- Problems to be handled each chapter (40%)
- Exam (60%)

**Regulations for carrying out activities**

The usual in University teaching

**Bibliography**

**Basic:**

**Complementary:**
