340603 - SIAC-R1O07 - Advanced Control Systems

Coordinating unit: 340 - EPSEVG - Vilanova i la Geltrú School of Engineering
Teaching unit: 707 - ESAII - Department of Automatic Control
Academic year: 2019
Degree: MASTER'S DEGREE IN AUTOMATIC SYSTEMS AND INDUSTRIAL ELECTRONICS (Syllabus 2012).
(Teaching unit Compulsory)
ECTS credits: 5
Teaching languages: Catalan, English

Teaching staff
Coordinator: PAU MARTI COLOM
Others: PAU MARTI COLOM

Opening hours
Timetable: To be defined

Prior skills
In construction

Degree competences to which the subject contributes

Specific:
1. CC01 - Ability to research, design, develop and characterize advanced control systems that enable the dynamic system to behave according to the operational performance requirements.
2. CC02 - Capacity and analyzing the results of the advanced control system integrated into the automated process, formulating alternatives in design or implementation if the controlled system does not reach the required specification.

Transversal:
3. TEAMWORK: Being able to work in an interdisciplinary team, whether as a member or as a leader, with the aim of contributing to projects pragmatically and responsibly and making commitments in view of the resources that are available.
4. EFFECTIVE USE OF INFORMATION RESOURCES: Managing the acquisition, structuring, analysis and display of data and information in the chosen area of specialization and critically assessing the results obtained.

Teaching methodology

Combinantion of theoretical classes, problem based learning and lab classes

Learning objectives of the subject

Students will be able to analyse, design and implement advanced control systems
### Study load

## 340603 - SIAC-R1007 - Advanced Control Systems

### Content

| Introduction | **Learning time**: 2h  
**Theory classes**: 2h |
|--------------|----------------------|
| **Description:**  
Introduction  
**Related activities:**  
In construction  
**Specific objectives:**  
In construction |

| Linear systems | **Learning time**: 4h  
**Theory classes**: 4h |
|----------------|----------------------|
| **Description:**  
State space models for linear systems  
**Related activities:**  
In construction  
**Specific objectives:**  
In construction |

| Non-linear systems | **Learning time**: 4h  
**Theory classes**: 4h |
|--------------------|----------------------|
| **Description:**  
Non-linear systems  
**Related activities:**  
In construction  
**Specific objectives:**  
In construction |
| **Advanced techniques for controller design** | **Learning time:** 5h  
Theory classes: 5h |

340603 - SIAC-R1007 - Advanced Control Systems

Descriptions of the assignments due and their relation to the assessment:
In construction

Specific objectives:
In construction

Qualification system

Final mark: 50% Theory + 50% Labs

Theory is evaluated via exams
Labs are as evaluated according to the lab deliveries.

Regulations for carrying out activities

Exams are with computer and with class notes

Bibliography

Basic:
