

Course guide

240EM121 - 240EM121 - Advanced Ceramic Materials and Inorganic Matrix Composites

Last modified: 02/06/2022

Unit in charge: Barcelona East School of Engineering
Teaching unit: 702 - CEM - Department of Materials Science and Engineering.

Degree: ERASMUS MUNDUS MASTER'S DEGREE IN ADVANCED MATERIALS SCIENCE AND ENGINEERING (Syllabus 2014). (Optional subject).
 MASTER'S DEGREE IN MATERIALS SCIENCE AND ENGINEERING (Syllabus 2014). (Optional subject).

Academic year: 2022 **ECTS Credits:** 4.5 **Languages:** English

LECTURER

Coordinating lecturer: Llanes Pitarch, Luis Miguel

Others: Llanes Pitarch, Luis Miguel
 Jimenez Piqué, Emilio
 Turón Viñas, Miquel

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:

CEMCEM-08. (ENG) Avaluar el temps de vida en servei, la reutilització, la recuperació i el reciclatge de productes atenent a les característiques dels materials que el conformen

CEMCEM-02. (ENG) Dissenyar i desenvolupar productes, processos, sistemes i serveis, així com l'optimització d'altres ja desenvolupats, atenent a la selecció de materials per a aplicacions específiques

Transversal:

04 COE N3. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 3. Communicating clearly and efficiently in oral and written presentations. Adapting to audiences and communication aims by using suitable strategies and means.

06 URI N3. EFFECTIVE USE OF INFORMATION RESOURCES - Level 3. Planning and using the information necessary for an academic assignment (a final thesis, for example) based on a critical appraisal of the information resources used.

TEACHING METHODOLOGY

Subject in process of extinction. There is no teaching, the students that enroll it do so only with the right to an exam.

LEARNING OBJECTIVES OF THE SUBJECT

To become familiar with advanced ceramics and inorganic-matrix (metal- and ceramic-) composites regarding structural and functional applications. Fundamental structure-property relationships underlying mechanical, thermal and energy-related parameters. Case Studies in design and performance of advanced ceramic as well as metal- and ceramic- matrix composites.

STUDY LOAD

Type	Hours	Percentage
Hours small group	13,5	12.00
Hours large group	27,0	24.00
Self study	72,0	64.00

Total learning time: 112.5 h

CONTENTS

Tema 1. Introduction: Advanced ceramics and composites

Description:

Advanced ceramics and inorganic (metal- and ceramic-) matrix composites. Microstructural and processing aspects. Properties and applications.

Full-or-part-time: 15h

Theory classes: 4h 30m

Practical classes: 1h 30m

Self study : 9h

Tema 2. Advanced ceramics

Description:

Definition. Chemical routes to precursors. Consolidation and densification. Structural ceramics. Toughening methods. Functional Ceramics. Applications.

Full-or-part-time: 33h 45m

Theory classes: 9h

Practical classes: 4h 30m

Self study : 20h 15m

Tema 3. Ceramic matrix composites

Description:

Definition. Introduction to ceramic matrix materials and ceramic reinforcements. Processing of monolithic ceramics and particulate composites, whisker and short fiber reinforced composites; long fiber composites. Characteristics of matrix and reinforcement interfaces. Micromechanics, thermal and physical properties of composites. Mechanical and creep behaviour of ceramic matrix composites. Applications.

Full-or-part-time: 30h

Theory classes: 9h

Practical classes: 3h

Self study : 18h

Tema 4. Metal matrix composites

Description:

Definition. Types of metal-matrix composites and microstructural features. Fabrication processes. Load transfer concept. Interfacial bonding strength. Mechanical, thermal and environmental performance. Applications

Full-or-part-time: 33h 45m

Theory classes: 9h

Practical classes: 4h 30m

Self study : 20h 15m

GRADING SYSTEM

Subject in process of extinction. There is only one final test that corresponds to 100% of the final grade of the subject.
