

Course guide

804248 - A3D - 3D Animation

Last modified: 20/07/2025

Unit in charge: Image Processing and Multimedia Technology Centre
Teaching unit: 804 - CITM - Image Processing and Multimedia Technology Centre.

Degree: BACHELOR'S DEGREE IN VIDEO GAME DESIGN AND DEVELOPMENT (Syllabus 2014). (Compulsory subject).

Academic year: 2025 **ECTS Credits:** 6.0 **Languages:** Catalan, English

LECTURER

Coordinating lecturer: Ripoll, Marc

Others: Ripoll, Marc
Cabello, José María

TEACHING METHODOLOGY

Learning of new contents through theory, references and practical examples.
Participative classroom where to resolve problems and discuss contents.
Practical exercises to apply and experiment with the contents of the course. They will be used to work during the week and improve the skills to master the 3d design tools and techniques.

LEARNING OBJECTIVES OF THE SUBJECT

- To describe the basic concepts and procedures involved in the modeling, texture, lighting and 2D and 3D animation of objects, characters and environments for video games.
- To efficiently use computer programs, composition graphics and animation of objects and 2D and 3D characters.
- To apply computer animation techniques in 2D and 3D animation, implementing mathematical and physical foundations.
- To analyse movement in objects, humans and animals for recreation in 2D and 3D animation.
- To create objects, characters, textures, scenes, visual effects and 2D and 3D animations for inclusion in video game projects.

STUDY LOAD

Type	Hours	Percentage
Hours large group	18,0	12.00
Guided activities	10,0	6.67
Hours medium group	32,0	21.33
Self study	90,0	60.00

Total learning time: 150 h

CONTENTS

Animation

Description:

Animation concepts
Playback speed
Keyframes
Animation curves

Full-or-part-time: 26h

Theory classes: 3h
Practical classes: 7h
Guided activities: 1h
Self study : 15h

Rigging and Skinning

Description:

Setup
Joints
Inverse kinematics
Skinning

Full-or-part-time: 41h 20m

Theory classes: 5h
Practical classes: 8h 20m
Guided activities: 3h
Self study : 25h

Character animation

Description:

References and acting
Animation concepts with characters
Motion capture
Facial animation

Full-or-part-time: 41h 20m

Theory classes: 5h
Practical classes: 8h 20m
Guided activities: 3h
Self study : 25h

Techniques

Description:

Retargeting
Scripting
Physics
Non Linear animation

Full-or-part-time: 41h 20m

Theory classes: 5h
Practical classes: 8h 20m
Guided activities: 3h
Self study : 25h

ACTIVITIES

Exercise 1

Description:

To create a functional rig for a character and adjust the skin until getting a ready to animate character.

Specific objectives:

To practice and better understand the rigging tools and techniques applied to characters.

Material:

Autodesk Maya

Delivery:

The exercise will be uploaded to an Atenea folder specified by the professor and saved as a Maya scene with the full name of the student.

Full-or-part-time: 10h

Self study: 10h

Exercise 2

Description:

Design the animations of a character and create the basic poses for the integration into a videogames.

Specific objectives:

To animate a character, designing his actions.

Material:

Autodesk Maya

Delivery:

The exercise will be uploaded to an Atenea folder specified by the professor and saved as a Maya scene with the full name of the student.

Full-or-part-time: 20h

Self study: 15h
Guided activities: 5h

GRADING SYSTEM

2 exercises

1 practice with a percentage of 15% of the final evaluation.

1 practice with a percentage of 30% of the final evaluation.

1 midterm exam with a percentage of 15% from the final evaluation.

1 final exam with a percentage of 30% from the final evaluation.

Learning attitude and learning: 10% of the final evaluation.

Revaluation exam: possibility to access the revaluation exam to reevaluate the two previous exams (45% of the final evaluation). Only students that didn't pass the course can access the revaluation exam.

Irregular actions that may lead to a significant variation of the grade of one or more students constitute a fraudulent performance of an evaluation act. This action entails the descriptive grade of failure and a numerical grade of 0 for the ordinary global evaluation of the course, without the right to re-evaluation.

If the lecturers have indications of the use of AI tools not allowed in the evaluation tests, they may summon the students concerned to an oral test or a meeting to verify the authorship.

EXAMINATION RULES.

Part of the exercises can be done during classes with the lecturer of the course. The students will also have to dedicate time for independent work (outside the timetable) to carry out the exercises. To do them, students must follow the indications specified in the work document.

Once the exercise is finished, it will be deposited in the Virtual Campus in the delivery classroom and on the corresponding date, only those exercises delivered before 24:00 hours of the deadline will be taken into account for the evaluation.

The documents must be completed, following the instructions, especially regarding the file names. The correct management of the documentation provided is an aspect of the competences to be acquired and part of the evaluation.
