820089 - PDM - Mobile Devices Programming

Last modified: 21/06/2021

Unit in charge: Barcelona East School of Engineering
Teaching unit: 723 - CS - Department of Computer Science.

Degree: BACHELOR'S DEGREE IN CHEMICAL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR'S DEGREE IN MATERIALS ENGINEERING (Syllabus 2010). (Optional subject).

Academic year: 2021 **ECTS Credits:** 6.0 **Languages:** Catalan, Spanish

LECTURER

Coordinating lecturer: Antoni Perez-Poch

Others: Antoni Perez-Poch

PRIOR SKILLS

Basic programming. (Subject: Informatics, first course)

REQUIREMENTS

None.

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:

1. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.
3. Apply their knowledge to industrial informatics and communications.

Transversal:

2. ENTREPRENEURSHIP AND INNOVATION - Level 3. Using knowledge and strategic skills to set up and manage projects. Applying systemic solutions to complex problems. Devising and managing innovation in organizations.

TEACHING METHODOLOGY

The course uses a methodology based on PBL - Project Based Learning: guided work (laboratory) - 30 % - and a final project - 70%.

LEARNING OBJECTIVES OF THE SUBJECT

- Let the student know about the concepts and basic usages of mobile device programming (phones and tablets) with Android.
- Provide programming techniques for mobile devices.

STUDY LOAD

Type	Hours	Percentage
Hours small group	60,0	40.00
Self study	90,0	60.00

Total learning time: 150 h

CONTENTS

(ENG) Instalación e introducción al entorno de desarrollo (SDK) de Android. Android Studio

Description:

Introduction to the programming framework

Specific objectives:

Knowing how to develop standard programs

Related activities:

Lab 1

Related competencies :

CEEIA-28. Apply their knowledge to industrial informatics and communications.

CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 10h

Laboratory classes: 4h

Self study : 6h

(ENG) Estructuras básicas de programación en el entorno Android.

Description:

Basic Programming

Specific objectives:

Be able to develop elementary programs within a given programming framework

Related activities:

Lab 3

Related competencies :

CEEIA-28. Apply their knowledge to industrial informatics and communications.

CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 10h

Laboratory classes: 4h

Self study : 6h

(ENG) Tratamiento de gráficos.

Description:

Graphics programming

Specific objectives:

Be able to program with graphics

Related activities:

Lab 3

Related competencies :

CEEIA-28. Apply their knowledge to industrial informatics and communications.

CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 10h

Laboratory classes: 4h

Self study : 6h

(ENG) Acceso a los accesorios del dispositivo móvil.

Description:

I/O device interface programming

Specific objectives:

Be able to program the I/O device communications

Related activities:

Lab 4

Related competencies :

CEEIA-28. Apply their knowledge to industrial informatics and communications.

CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 10h

Laboratory classes: 4h

Self study : 6h

(ENG) Programación con bases de datos.

Description:

Database programming.

Specific objectives:

Be able to program a data base with the device

Related activities:

Lab 5

Related competencies :

CEEIA-28. Apply their knowledge to industrial informatics and communications.

CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 10h

Laboratory classes: 4h

Self study : 6h

Applications development with MIT App Inventor

Description:

Applications development with MIT App Inventor

Specific objectives:

Mobile app development.

Related activities:

Programming project

Full-or-part-time: 100h

Laboratory classes: 40h

Self study : 60h

GRADING SYSTEM

Final grade will result from adding that of laboratory work (30%) and that of a final project (another 70%) in a number of submissions.

There is no final exam nor reevaluation.

EXAMINATION RULES.

Laboratory works are guided work. The final project will be elected by the student with the previous approval of the professor.
