

Document 3. 2017-2019 ACTION PLAN

Human Resources Strategy for Researchers (HRS4R)

Since the Universitat Politècnica de Catalunya (UPC) endorsed the European Charter and Code for Researchers, it has aimed to participate in all initiatives such as HRS4R that lead to an improvement in the working conditions and professional prospects of researchers working in the area of university research.

The Work Plan submitted by the UPC to obtain the HRS4R badge was devised by an ad hoc working group composed of representatives of the main units involved. The group worked under the guidelines of the Steering Committee formed by representatives of the UPC Executive Council and the University's functional administrative and service units.

This plan, which is the result of a comprehensive analysis of the legal framework and the institutional regulations implemented at the UPC, must serve to improve, modify or establish initiatives relating to the labour relations of research staff, mainly in the areas of:

- α Recruitment processes
- α Working conditions
- α Career plans

In addition, equal opportunities and ethical constraints for scientific practice were considered in the definition of actions for all three areas.

To strengthen the University's social commitment, all of the actions described below respect the principles of the Responsible Research and Innovation (RRI) initiative, which implies that societal actors work together during the entire research and innovation process, in order to better align both the process and its outcomes with the values, needs and expectations of society.

The actions that emerged after the working group's self-assessment process are described below. Most of them are associated with one or more principles of the Charter and Code, except for Actions 7 and 7b, which are not linked to any principle but are designed to improve the recruitment process.
