Preliminary Call for Papers

WER'08 is the eleventh edition of the Workshop on Requirements Engineering series. The workshop started as a meeting of the Ibero American requirements engineering community, but over the years has attracted attention of researchers from other parts of the world as well. WER 2008 will be held in Barcelona, Catalonia, Spain, during the first weeks of September.

Submission Information

WER'08 invites submissions of high quality papers describing novel research and/or experiences in the field of Requirements Engineering. Papers presenting original results on both research as well as industrial viewpoints on all aspects of Requirements Engineering are welcome.

Topics of interest include, but are not restricted to:

- Requirements elicitation, analysis, documentation, v&v
- Requirements specification languages, methods, processes, and tools
- Requirements management, traceability, viewpoints
- Requirements prioritization, and negotiation
- Modeling of requirements, goals, and domains
- Non-functional requirements
- Requirements engineering and software architecture
- Aspect-oriented requirements engineering
- Requirements for COTS-based systems
- Requirements for the agent-oriented paradigm
- Requirements for product lines
- Requirements engineering case studies and experiences
- Social, cultural, and cognitive factors in requirements engineering
- Aligning requirements to business goals and processes
- Requirements engineering education and training

Papers should be submitted through the website, using IEEE CS proceedings format as a PDF file. For downloading templates, go to the Author Forms web page of the IEEE Computer Society. Papers must not exceed 12 pages including figures, author's information, abstract, and bibliography.

Papers may be in English, Portuguese, Spanish or French but English is preferred. During the event, participants MUST present their work in English.

All papers of WER series are indexed by DBLP and can be found at <http://wer.inf.puc-rio.br/WERpapers/>.
