

# Bachelor's degree in Chemical Engineering

## Manresa School of Engineering (EPSEM)

On the **bachelor's degree in Chemical Engineering** you will train to be a multidisciplinary professional who can analyse, design, test and operate equipment and processes in which there are changes in the state, internal energy or composition of matter. You will acquire the knowledge and skills needed to design and control chemical plant production and to supervise quality control and environmental management projects. You will understand experimental, testing and process characterisation methods and monitoring, control and product optimisation systems and technologies.

### GENERAL DETAILS

#### Duration

4 years

#### Study load

240 ECTS credits (including the bachelor's thesis). One credit is equivalent to a study load of 25-30 hours.

#### Delivery

Face-to-face

#### Language of instruction

Check the language of instruction for each subject (and timetable) in the course guide in the curriculum.

Information on [language use in the classroom and students' language rights](#).

#### Fees and grants

Approximate fees per academic year: €1,107 (€2,553 for non-EU residents). [Consult the public fees system based on income \(grants and payment options\)](#).

#### Location

[Manresa School of Engineering \(EPSEM\)](#)

#### Official degree

[Recorded in the Ministry of Education's degree register](#)

### ADMISSION

#### Places

180

#### Registration and enrolment

[What are the requirements to enrol in a bachelor's degree course?](#)

#### Legalisation of foreign documents

All documents issued in non-EU countries must be [legalised and bear the corresponding apostille](#).

### PROFESSIONAL OPPORTUNITIES

#### Professional opportunities

- Design, operation, management, commercial organisation and installation and equipment supervision in chemical, pharmaceutical, agrifood, biotechnology, energy, petrochemical and service industries.

- Design and control of production and quality in chemical plants.
- Energy auditing and environmental management.
- Chemical analysis, testing and process and product characterisation in laboratories.
- Development of research, development and innovation projects.
- Drafting of technical, advisory and feasibility reports.
- Public administration.
- Teaching and research.

## CURRICULUM

---

Subjects	ECTS credits	Type
<b>FIRST SEMESTER</b>		
Chemistry	6	Compulsory
Environmental Technologies and Sustainability	6	Compulsory
Introduction to Computing	6	Compulsory
Mathematics I	6	Compulsory
Physics I	6	Compulsory
<b>SECOND SEMESTER</b>		
Graphic Expression	6	Compulsory
Materials Science and Technology	6	Compulsory
Mathematics II	6	Compulsory
Physics II	6	Compulsory
Statistics	6	Compulsory
<b>THIRD SEMESTER</b>		
Business	6	Compulsory
Electrical Systems	6	Compulsory
Mathematics III	6	Compulsory
Mechanical Systems	6	Compulsory
Thermodynamics and Fluid Mechanics	6	Compulsory

### FOURTH SEMESTER

<b>Subjects</b>	<b>ECTS credits</b>	<b>Type</b>
Chemical Engineering Fundamentals	6	Compulsory
Electronic Systems	6	Compulsory
Engineering Skills	6	Optional
Industrial Control and Automation	6	Compulsory
Operations Management	6	Compulsory
Strength of Materials	6	Compulsory
<b>FIFTH SEMESTER</b>		
Biotechnology	6	Compulsory
Chemical Reaction Engineering	6	Compulsory
Fluid Transport Engineering and Heat Transmission	6	Compulsory
Organic Chemistry	6	Compulsory
Physical Chemistry	6	Compulsory
<b>SIXTH SEMESTER</b>		
Chemical Analysis	6	Compulsory
Experimentation in Chemical Engineering	6	Compulsory
Process and Product Engineering	6	Compulsory
Project Methodology, Management and Orientation	6	Compulsory
Separation Operations	6	Compulsory
<b>SEVENTH SEMESTER</b>		
Advanced Programming	6	Optional
Biotechnological Industrial Processes	6	Optional
Business English	6	Optional
Chemistry for Industry	6	Optional
Construction Material Factories	6	Optional
Construction Materials	6	Optional
Data Management and Storage	6	Optional
Decision Optimisation and Theory	6	Optional
Drillings Applied to Engeneering	6	Optional
Energy Resources	6	Optional
Energy Technology	6	Optional
Environmental Management	6	Optional
Environmental Waste and Soil Technology	6	Optional
Environments Technology I	6	Optional
Environments Technology II	6	Optional
Experimentation in Chemical Engineering II	6	Optional
Fuels and Thermal Processes	6	Optional
Further Chemical Analysis	6	Optional
Further Process and Product Engineering	6	Optional

<b>Subjects</b>	<b>ECTS credits</b>	<b>Type</b>
Geotechnical Engineering	6	Optional
Graphical User Interfaces	6	Optional
Hydrology and Hydrogeology	6	Optional
Innovation, People Management and Business Start-Up	6	Optional
Maintenance Management	6	Optional
Natural Resource Management	6	Optional
Nuclear Technology	6	Optional
Prevention of Occupational Risks	6	Optional
Quality Management and Integrated Quality, Safety and Environmental Management Systems	6	Optional
Simulation and Control for Chemical Processes	6	Compulsory
Transport Phenomena	6	Optional
<b>EIGHTH SEMESTER</b>		
Bachelor's Thesis	24	Project
