

Bachelor's degree in Telematics Engineering

The **bachelor's degree in Telematics Engineering** provides the knowledge needed to conceive, design, implement and operate telematic networks, as well as knowledge of network security mechanisms, data transmission, protocols, services and applications. You will receive a solid grounding in telecommunications and informatics that will enable you to design, implement and operate communication networks (access, transport, sensor, wireless, etc.) and their services and applications (telephony, web, e-mail, file sharing, online gaming, e-commerce, etc.) with the necessary mechanisms to ensure security and quality.

GENERAL DETAILS

Duration

4 years

Study load

240 ECTS credits (including the bachelor's thesis). One credit is equivalent to a study load of 25-30 hours.

Delivery

Face-to-face

Fees and grants

Approximate fees per academic year: €1,660 (€2,490 for non-EU residents). [Consult the public fees system based on income \(grants and payment options\)](#).

Location

[Castelldefels School of Telecommunications and Aerospace Engineering \(EETAC\)](#)

Official degree

[Recorded in the Ministry of Education's degree register](#)

ADMISSION

Places

100 / 10 (February)

Registration and enrolment

[What are the requirements to enrol in a bachelor's degree course?](#)

Legalisation of foreign documents

All documents issued in non-EU countries must be [legalised and bear the corresponding apostille](#).

DOUBLE-DEGREE AGREEMENTS

Double-degree pathways at a single school

- Bachelor's degree in Network Engineering / Bachelor's degree in Telecommunications Systems Engineering

PROFESSIONAL OPPORTUNITIES

Professional opportunities

- Telematic project supervision and management in the communications, audiovisual, recreational, cultural, healthcare, tourist and industrial, automotive sectors and in the public administration.
- Design, management and development of networks.
- Design and development of broadband and multimedia communications services and applications.
- Project supervision and management in the fields of mobile, access and transport networks and the internet.
- Freelance work: consultancy and advisory services.

- Product research, design and innovation.
- Internet of things (smart home, smart cities, industry 4.0).

ORGANISATION: ACADEMIC CALENDAR AND REGULATIONS

CURRICULUM

Subjects	ECTS credits	Type
FIRST SEMESTER		
Business Management	6	Compulsory
Calculus	6	Compulsory
Electronics for Telecommunications	6	Compulsory
Introduction to Computers	6	Compulsory
Physics	6	Compulsory
SECOND SEMESTER		
Fundamentals of Telematics	6	Compulsory
Linear Algebra and Applications	6	Compulsory
Linear Circuits and Systems	6	Compulsory
Mathematics for Telecommunications	6	Compulsory
Programming Project	6	Compulsory
THIRD SEMESTER		
Digital Circuits and Systems	6	Compulsory
Digital Signal Processing	6	Compulsory
Fundamentals of Communications	6	Compulsory
Network Interconnection Techniques	6	Compulsory
Probability and Statistics	6	Compulsory
FOURTH SEMESTER		
Electromagnetic Waves in Communication Systems	7.5	Compulsory
Electronic Circuits and Power Supply Systems	6	Compulsory
Internet Architecture and Protocols	6	Compulsory
Operating Systems	6	Compulsory
Transmitters and Receivers	4.5	Compulsory

Subjects	ECTS credits	Type
FIFTH SEMESTER		
Audiovisual Services on the Internet	4	Compulsory
Local, Access and Metropolitan Networks	6	Compulsory
Mobility, Networks and Services	6	Compulsory
Network Analysis and Dimensioning	4	Compulsory
Service and Application Design	10	Compulsory
SIXTH SEMESTER		
Applications Engineering	12	Compulsory
Network Planning	4	Compulsory
Network Security	4	Compulsory
Telecommunications Infrastructure and Operation	6	Compulsory
Transport Networks	4	Compulsory
SEVENTH SEMESTER		
Applied Engineering Projects	6	Optional
Drones Design Projects	6	Optional
Engineering Projects	6	Optional
Instrumentation and Electronic Systems in Smarts Cities	6	Optional
Introduction to Technology Asset Management	3	Optional
Optical Fiber Sensors: Technologies and Applications	3	Optional
Quantum Information Technology	6	Compulsory
Radiolocation	6	Optional
Smart Cities: Cybersecurity and Big Data	6	Optional
Smart Cities: Internet of Things and Augmented Reality	6	Optional
Social Impact	6	Optional
Space Systems	6	Optional
Systems and Technologies for Communications in Smart Cities	6	Optional
Technical and Corporate Communication	6	Optional
Telecommunications Policy and Regulation	6	Optional
Wireless Communications	6	Optional
Work Placement	12	Compulsory
EIGHTH SEMESTER		
Bachelor's Thesis	24	Project
