

# Bachelor's degree in Geoinformation and Geomatics Engineering

The extensive application of ICTs in the field of geoinformation (or georeferenced spatial data) has created the need for professionals in this area of knowledge. The **bachelor's degree in Geoinformation and Geomatics Engineering** intends to respond to this need. It will train you for a career in fields such as geographic information systems, the use of geoinformation for mobile applications and big data processing, global positioning and navigation systems, smart cities, fleet management, photogrammetry (including the use of drones and UAVs), remote sensing, geodesy and surveying.

---

## GENERAL DETAILS

---

### Duration

4 years

### Study load

240 ECTS credits (including the bachelor's thesis). One credit is equivalent to a study load of 25-30 hours.

### Delivery

Face-to-face

### Language of instruction

Check the language of instruction for each subject (and timetable) in the course guide in the curriculum.

Information on [language use in the classroom and students' language rights](#).

### Fees and grants

Approximate fees per academic year: €1,107 (€2,253 for non-EU residents). [Consult the public fees system based on income \(grants and payment options\)](#).

### Location

[Barcelona School of Building Construction \(EPSEB\)](#)

### Official degree

[Recorded in the Ministry of Education's degree register](#)

---

## ADMISSION

---

### Places

40

### Registration and enrolment

[What are the requirements to enrol in a bachelor's degree course?](#)

### Legalisation of foreign documents

All documents issued in non-EU countries must be [legalised and bear the corresponding apostille](#).

---

## PROFESSIONAL OPPORTUNITIES

---

### Professional opportunities

- Companies providing terrestrial, aerial and satellite geoinformation solutions and value-added solutions based on big geodata and for mobile applications.
- Companies that design, deploy and manage geographic information systems (GISs).
- Construction and civil engineering companies and surveyors.

- Public bodies: cartographic and geographic institutes, city councils, technical departments of ministries, etc.
- The study of environmental variables and measurement of land and maritime resources for urban, rural and regional development planning.
- Data acquisition in the form of land, architectural and archaeological surveys, as well as layouts and measurements related to civil works and building construction.
- Management, planning, valuation, administration and assessment of urban and rural property.

## CURRICULUM

---

### Subjects

**ECTS  
credits**

**Type**

#### FIRST SEMESTER

Algebra	6	Compulsory
Calculus	6	Compulsory
Computer Assisted Design	6	Compulsory
Geographic Information and Cartography	6	Compulsory
Informatics	6	Compulsory

#### SECOND SEMESTER

Electromagnetism and Optics	6	Compulsory
Geomorphology	6	Compulsory
Mathematical Methods	6	Compulsory
Mechanics	6	Compulsory
Surveying Instruments and Methods	6	Compulsory

#### THIRD SEMESTER

Digital Cartography	6	Compulsory
Fundamentals of Civil Engineering	4.5	Compulsory
Geometric Geodesy	6	Compulsory
Geophysics	4.5	Compulsory
Mathematical Cartography	4.5	Compulsory
Observation Adjustment in Geomatics	6	Compulsory

#### FOURTH SEMESTER

Business Organisation and Management	6	Compulsory
Geographic Information Systems	6	Compulsory

<b>Subjects</b>	<b>ECTS credits</b>	<b>Type</b>
Gis Databases	6	Compulsory
Global Satellite Positioning Systems	6	Compulsory
Physical Geodesy	4.5	Compulsory
<b>FIFTH SEMESTER</b>		
Digital Image Processing	6	Compulsory
Digital Photogrammetry	7.5	Compulsory
Geoservices: Design and Implementation	6	Compulsory
Network Design, Observation and Adjustment	6	Compulsory
Remote Sensing	4.5	Compulsory
<b>SIXTH SEMESTER</b>		
3D Data Processing	4.5	Compulsory
Environmental Engineering	4.5	Compulsory
Smart Cities	4.5	Compulsory
Spatial Databases	4.5	Compulsory
Surveying in Civil Engineering	6	Compulsory
Urbanism and Regional Planning	6	Compulsory
<b>SEVENTH SEMESTER</b>		
Bigdata for Geoservices	6	Compulsory
Cadastre	6	Compulsory
Geomatic Projects	6	Compulsory
Non-Conventional Surveys	6	Compulsory
Spatial Data Infrastructure	6	Compulsory
<b>EIGHTH SEMESTER</b>		
Expert Reports	4.5	Optional
Geoinformation Sensors and Capture Systems	4.5	Optional
Gis Project Design and Management	4.5	Optional
High-Precision Processing of Gns Data	4.5	Optional
Hydrographic and Underground Surveying	4.5	Optional
Programming for Geoinformation Applications	4.5	Optional
Remote Sensing Project	4.5	Optional
Terrestrial and Uav Photogrammetry	4.5	Optional
Bachelor's Thesis	12	Project
