

Bachelor's degree in Economics-Statistics (interuniversity UB-UPC double degree)

This dual-track programme in **economics and statistics**, coordinated by the Universitat de Barcelona (UB) and with the UPC as a participant, allows you to earn two degrees. In addition to the scientific training provided in the bachelor's degree in Economics – which will enable you to understand the fundamentals of theoretical and applied economics and apply the analytical techniques of this discipline – you will develop the skills that statisticians use to collect and analyse information. As a graduate of this double-degree course you will be able to rapidly adapt to economic and social changes, identify problems, and deliver solutions based on advanced information analysis methods for optimal decision-making. The course is offered jointly with the [University of Barcelona \(UB\)](#), so students reap the rewards of a richer learning experience, benefiting from the combined expertise of UPC and UB teaching staff in engineering and technology, economics, and social and health sciences.

GENERAL DETAILS

Duration

5 years and a half

Delivery

Face-to-face

Language of instruction

Check the language of instruction for each subject (and timetable) in the course guide in the curriculum.

Information on [language use in the classroom and students' language rights](#).

Fees and grants

Approximate fees per academic year: €1,107 (€2,553 for non-EU residents). [Consult the public fees system based on income \(grants and payment options\)](#).

Location

[School of Mathematics and Statistics \(FME\)](#)

ADMISSION

Places

20

Registration and enrolment
