

Bachelor's degree in Industrial Technologies and Economic Analysis (interuniversity UPC-UPF degree)

The **bachelor's degree in Industrial Technologies and Economic Analysis** combines industrial engineering topics and the fundamentals of economics to provide high-level interdisciplinary training that will allow you to adapt to new situations and assimilate the future technological developments that will enable businesses to improve their products and processes.

The degree is taught entirely in English at the Universitat Politècnica de Catalunya (UPC) and Pompeu Fabra University (UPF). It responds to the need for new industrial leaders who have both a thorough understanding of innovation and technology and detailed knowledge of economics. It will give you the opportunity to work on innovation projects in placements at national and international companies, as well as excellent employment prospects.

GENERAL DETAILS

Duration

4 years

Study load

240 ECTS credits (including the bachelor's thesis). One credit is equivalent to a study load of 25-30 hours.

Delivery

Face-to-face

Timetables

Morning and afternoon

Language of instruction

English

Fees and grants

Approximate fees per academic year: €1,660 (€2,490 for non-EU residents). [Consult the public fees system based on income \(grants and payment options\)](#).

Scholarships

The degree has an own scholarship program for Scholarships for the university system.

Location

[Barcelona School of Industrial Engineering \(ETSEIB\)](#)

ADMISSION

Places

50

Registration and enrolment

[What are the requirements to enrol in a bachelor's degree course?](#)

Legalisation of foreign documents

All documents issued in non-EU countries must be [legalised and bear the corresponding apostille](#).

PROFESSIONAL OPPORTUNITIES

Professional opportunities

- Supervision and management of projects, facilities, plants, businesses and technology centres in a range of industrial sectors such as energy; iron and steel; metallurgy; chemicals; robotics; the automotive and rail

industries; metal, mechanical and electrical construction; and smart materials, nanotechnology and bioengineering.

- Calculation and design of products and processes that have an effect on the economic situation, the business sector, the market and business activities.
- Strategic planning, micro- and macroeconomics, quality management and environmental management.
- Research, development and innovation and the analysis of their implications in the management of products, processes and methods.
- Leadership and management of economic environments undergoing change.
- Economics and management of businesses in regulated sectors and network services.

CURRICULUM

Subjects	ECTS credits	Type
FIRST SEMESTER		
Algebra and Geometry	6	Compulsory
Calculus I	6	Compulsory
Chemistry	6	Compulsory
Physics I	6	Compulsory
Programming	6	Compulsory
SECOND SEMESTER		
Calculus II	6	Compulsory
Introduction to Economics	6	Compulsory
Introduction to Game Theory	6	Compulsory
Physics II	6	Compulsory
Probability and Statistics	6	Compulsory
THIRD SEMESTER		
Econometrics	6	Compulsory
Industrial Design	6	Compulsory
Mechanics	6	Compulsory
Microeconomics I	6	Compulsory
Numerical Methods in Engineering	6	Compulsory
FOURTH SEMESTER		
Continuum Mechanics	4.5	Compulsory

Subjects	ECTS credits	Type
Macroeconomics I	6	Compulsory
Mechanism and Machine Theory	6	Compulsory
Microeconomics II	6	Compulsory
Quality Management	3	Compulsory
System Dynamics	4.5	Compulsory
FIFTH SEMESTER		
Digital Control	4.5	Compulsory
Macroeconomics II	6	Compulsory
Manufacturing	3	Compulsory
Operations Research	4.5	Compulsory
Science and Technology of Materials	6	Compulsory
Thermodynamics	6	Compulsory
SIXTH SEMESTER		
Electrotechnics	6	Compulsory
Fluid Mechanics	6	Compulsory
Macroeconomics III	6	Compulsory
Microeconomics III	6	Compulsory
Strength of Materials	6	Compulsory
SEVENTH SEMESTER		
Business Economics	4.5	Compulsory
Electric Machinery	4.5	Compulsory
Environmental Engineering	4.5	Compulsory
International Financial Economics	6	Optional
Networks, Crowds and Markets	6	Optional
Production and Operations Management	6	Compulsory
Project Management	4.5	Compulsory
EIGHTH SEMESTER		
Electronics	6	Compulsory
Experimental Economics	6	Optional
Heat Transfer	6	Compulsory
International Economics	6	Optional
Topics in Macroeconomics	6	Optional
Topics in Microeconomics	6	Optional
Bachelor's Thesis	12	Project
