

# Bachelor's degree in Agronomic Science Engineering

On the **bachelor's degree in Agronomic Science Engineering** (which merges the content that had until now been taught on the bachelor's degrees in Agricultural Engineering and Agricultural, Environmental and Landscape Engineering), you will acquire the scientific and technological knowledge to design, plan, supervise and manage processes related to agricultural and livestock production; food quality control and safety mechanisms; the economic viability of farming companies; actions for environmental and landscape preservation and improvement; spatial planning; and fruit and vegetable production.

You can choose between two majors:

**Horticulture and Gardening.** You will receive multidisciplinary training in areas such as environmental management systems; water use; landscape design; implementation of green spaces; ecosystems and biodiversity; fruit and vegetable production; and plant propagation and nursery techniques. You will also learn the fundamentals of engineering technology, which will enable you to design green spaces and carry out environmental conservation and improvement, landscaping and fruit and vegetable production projects.

**Agricultural Production.** You will receive training in animal health, nutrition and welfare; livestock production systems; extensive farming and fruit and vegetable production; irrigation technology; agricultural machinery and buildings; crop protection; waste management; agroecology; and organic food production.

## Majors

- Horticulture and Gardening
- Agricultural Production

---

## GENERAL DETAILS

---

### Duration

4 years

### Study load

240 ECTS credits (including the bachelor's thesis). One credit is equivalent to a study load of 25-30 hours.

### Delivery

Face-to-face

### Language of instruction

Check the language of instruction for each subject (and timetable) in the course guide in the curriculum.

Information on [language use in the classroom and students' language rights](#).

### Fees and grants

Approximate fees per academic year: €1,107 (€2,553 for non-EU residents). [Consult the public fees system based on income \(grants and payment options\)](#).

### Location

[Barcelona School of Agri-Food and Biosystems Engineering \(EEABB\)](#)

### Official degree

[Recorded in the Ministry of Education's degree register](#)

---

## ADMISSION

---

## Places

55

## Registration and enrolment

[What are the requirements to enrol in a bachelor's degree course?](#)

## Legalisation of foreign documents

All documents issued in non-EU countries must be [legalised and bear the corresponding apostille](#).

---

## DOUBLE-DEGREE AGREEMENTS

### With the Universitat Rovira i Virgili (URV)

- Bachelor's degree in Oenology

---

## PROFESSIONAL OPPORTUNITIES

### Professional opportunities

- Technical management of agricultural and livestock farms and plant nurseries.
- Freelance work: projects, consulting, advice, appraisals, site management, environmental studies, surveying applications, occupational health and safety studies, etc.
- Public administrations (European Union, Spain, autonomous communities, city councils): rural development; spatial planning and management of rural areas; planning and management of green spaces and sports areas; management and use of municipal waste; and restoration and recovery of natural spaces.
- Agricultural service companies: agricultural and livestock facilities, rural infrastructure, agricultural machinery, seeds, pesticides, fertilisers, irrigation systems, computer technologies for agriculture, quality control, etc.
- Management and handling of water resources for agricultural use and agroenergy resources and use of agricultural waste.
- Management of agricultural companies and cooperatives and marketing and sales.
- Environmental and landscaping service companies: environmental impact and restoration studies and design of gardens and green spaces.
- Research and development in companies and public bodies: agricultural biotechnology, rural development, agricultural economics, food engineering, rural engineering, environmental management, and animal and crop production.

## CURRICULUM

### Subjects

**ECTS  
credits**

**Type**

### FIRST SEMESTER

Chemistry I	6	Compulsory
Drawing for Engineering	6	Compulsory
General Biology	6	Compulsory

<b>Subjects</b>	<b>ECTS credits</b>	<b>Type</b>
Mathematics I	6	Compulsory
Physics I	6	Compulsory
<b>SECOND SEMESTER</b>		
Chemistry II	6	Compulsory
Earth Sciences	6	Compulsory
Mathematics II	6	Compulsory
Physics II	6	Compulsory
Plant Biology	6	Compulsory
<b>THIRD SEMESTER</b>		
Basic Plant Production	6	Compulsory
Cropping Systems	6	Compulsory
Energy Systems and Components	6	Compulsory
Hydraulics	6	Compulsory
Statistics	6	Compulsory
<b>FOURTH SEMESTER</b>		
Agricultural Mechanisation	6	Compulsory
Animal Production	6	Compulsory
Geomatics	6	Compulsory
Market Analysis and Agricultural Valuation	6	Compulsory
Plant Genetics and Breeding	6	Compulsory
<b>FIFTH SEMESTER</b>		
Animal Feeding and Nutrition	6	Compulsory
Animal Feeding and Nutrition	6	Compulsory
Business Economics and Management	6	Compulsory
Crop Protection	6	Compulsory
Horticultural Technology	6	Compulsory
Implementation and Management of Green Spaces	6	Compulsory
Implementation and Management of Green Spaces	6	Compulsory
Landscape History and Composition	6	Compulsory
Landscape History and Composition	6	Compulsory
Ruminant Production	6	Compulsory
Ruminant Production	6	Compulsory
<b>SIXTH SEMESTER</b>		
Environmental Studies of Projects	6	Compulsory
Grain and Biomass Crops	6	Compulsory
Grain and Biomass Crops	6	Compulsory
Horticultural Production	6	Compulsory
Irrigation and Drainage Technology	6	Compulsory

<b>Subjects</b>	<b>ECTS credits</b>	<b>Type</b>
Landscape Design	6	Compulsory
Landscape Design	6	Compulsory
Monogastric Animal Production	6	Compulsory
Monogastric Animal Production	6	Compulsory
Multiplication and Nurseries	6	Compulsory
Multiplication and Nurseries	6	Compulsory
<b>SEVENTH SEMESTER</b>		
Advanced Statistics	6	Optional
Agroecology	6	Compulsory
Agroecology	6	Compulsory
Construction and Structural Design	6	Compulsory
Economic Botany	6	Optional
Entrepreneurship in the Agri-Food Sector	6	Optional
Life-Cycle Assessment of Products and Processes	6	Optional
Organic Agriculture	6	Optional
Postharvest and Logistics	6	Compulsory
Postharvest and Logistics	6	Compulsory
Viticulture	6	Optional
Work Placement	12	Optional
<b>EIGHTH SEMESTER</b>		
Project Workshop	6	Compulsory
Waste and Water Treatment and Use	6	Compulsory
Bachelor's Thesis	18	Project
