Bachelor's degree in Geological and Environmental Engineering (interuniversity UPC-UB degree)

This bachelor's degree does not offer places for 2018-2019 academic year.

This interuniversity bachelor's degree integrates the principles of the geological sciences with analysis and engineering techniques to provide reliable and sustainable solutions that are tailored to the needs of society. You will acquire the knowledge to assess and manage natural resources and environmental protection and to solve practical problems in the construction of infrastructure by applying sustainable engineering principles.

Students on this bachelor's degree, which is taught at the UPC's Barcelona School of Civil Engineering and the University of Barcelona's Faculty of Earth Sciences, must spend a period at a university abroad during the course of the degree.

---

**GENERAL DETAILS**

**Duration**
4 years

**Delivery**
Face-to-face

**Fees and grants**
Approximate fees per academic year: €2,551 (€3,826 for non-EU residents). Consult the public fees system based on income (grants and payment options).

---

**ADMISSION**

**Places**
40

**Registration and enrolment**
What are the requirements to enrol in a bachelor's degree course?

**Legalisation of foreign documents**
All documents issued in non-EU countries must be legalised and bear the corresponding apostille.

---

**PROFESSIONAL OPPORTUNITIES**

**Professional opportunities**
Graduates' employment prospects are related to construction, the environment, natural resources, natural hazards and instrumentation in all sectors in which geological and environmental engineering are applicable:

- Construction companies, consulting firms and laboratories.
- Environmental companies.
- Oil and gas industry. Prospecting and characterisation of natural resources (oil, gas, minerals, raw materials).
- Instrumentation and control companies.
- Administrations.
- Geological services.
- Research centres.
