

Bachelor's degree in Artificial Intelligence

The bachelor's degree in **Artificial Intelligence** aims to produce graduates who have the ability to identify how artificial intelligence (AI) techniques can provide innovative solutions to information technology problems in businesses and organisations and to apply these solutions in a way that brings added value.

This new degree covers a range of areas in AI, such as knowledge representation, automated reasoning, machine learning, natural language processing (text and speech), autonomous agents, cognitive robotics and computer vision. All graduates will have acquired cross-disciplinary skills in ethics and social impact.

The UPC is the first university in Spain to offer official courses of higher education in AI at all levels, that is, bachelor's, master's and doctoral degrees.

GENERAL DETAILS

Duration

4 years

Study load

240 ECTS credits (including the bachelor's thesis). One credit is equivalent to a study load of 25-30 hours.

Delivery

Face-to-face

Language of instruction

Check the language of instruction for each subject (and timetable) in the course guide in the curriculum.

Information on [language use in the classroom and students' language rights](#).

Fees and grants

Approximate fees per academic year: €1,107 (€2,553 for non-EU residents). [Consult the public fees system based on income \(grants and payment options\)](#).

Location

[Barcelona School of Informatics \(FIB\)](#)

ADMISSION

Places

50

Registration and enrolment

[What are the requirements to enrol in a bachelor's degree course?](#)

Legalisation of foreign documents

All documents issued in non-EU countries must be [legalised and bear the corresponding apostille](#).

PROFESSIONAL OPPORTUNITIES

Professional opportunities

- Design and development of solutions for natural language processing: machine translators, assistants, interfaces, etc.
- Design virtual and augmented reality applications.
- Design of interfaces for robots, advanced programming and collaborative robotics.
- Construction of intelligent systems in sectors such as finance, health and bioinformatics.

- Optimisation of production processes in industry, trade and distribution.
- Entrepreneurship: creation and management of innovative companies in the whole area of intelligent systems.
- Applications and research in medicine, automobiles, social networks, marketing, trade, etc.

CURRICULUM

Subjects	ECTS credits	Type
FIRST SEMESTER		
Algebra	6	Compulsory
Fundamentals of Computers	6	Compulsory
Fundamentals of Mathematics	6	Compulsory
Knowledge and Automatic Reasoning	6	Compulsory
Programming and Algorithms I	6	Compulsory
SECOND SEMESTER		
Calculus	6	Compulsory
Introduction to Robotics	6	Compulsory
Introduction to Statistics	6	Compulsory
Programming and Algorithms II	6	Compulsory
Systems Modeling and Simulation	6	Compulsory
THIRD SEMESTER		
Basic Algorithms of Artificial Intelligence	6	Compulsory
Introduction to Databases	6	Compulsory
Introduction to Machine Learning	6	Compulsory
Parallelism and Distributed Systems	6	Compulsory
Statistical Modeling	6	Compulsory
FOURTH SEMESTER		
Advanced Programming and Algorithms	6	Compulsory
Human Language Processing	6	Compulsory
Neural Networks and Deep Learning	6	Compulsory
Optimization	6	Compulsory

Subjects	ECTS credits	Type
Preprocessing and Advanced Models of Data Analysis	6	Compulsory
FIFTH SEMESTER		
Computer Vision	6	Compulsory
High Performance Computing	6	Compulsory
Knowledge-Based Systems	6	Compulsory
Unsupervised and Reinforcement Learning	6	Compulsory
Voice and Dialog Processing	6	Compulsory
SIXTH SEMESTER		
Advanced Databases	6	Compulsory
Advanced Reinforcement Learning	6	Optional
Advanced Robotics	6	Compulsory
Ethical and Social Aspects of Artificial Intelligence	6	Compulsory
Integrated Project of Artificial Intelligence	6	Compulsory
Introduction to Research	6	Optional
Processes of Intelligent Data Analysis	6	Compulsory
EIGHTH SEMESTER		
Bachelor's Thesis	18	Project
