Master's degree in Architecture

The master's degree in Architecture (master's degree website) qualifies graduates for professional practice in architecture. It aims to provide advanced knowledge that furthers the learning acquired on the degree in Architecture Studies or equivalent. It provides solid training. Students work in multidisciplinary workshops on spatial projects that approach contemporary problems from the standpoint of sustainability.

GENERAL DETAILS

Duration and start date
1 academic year, 60 ECTS credits. Starting September

Timetable and delivery
Afternoons. Face-to-face

Fees and grants
Approximate fees for the master's degree, excluding other costs (does not include non-teaching academic fees and issuing of the degree certificate):
€1,107 (€6,331 for non-EU residents).
More information about fees and payment options
More information about grants and loans

Language of instruction
Check the language of instruction for each subject in the course guide in the curriculum.
Information on language use in the classroom and students’ language rights.

Location
Vallès School of Architecture (Sant Cugat del Vallès)

Official degree
Recorded in the Ministry of Education's degree register

ADMISSION

General requirements
Academic requirements for admission to master's degrees

Specific requirements
The master's degree in Architecture is reserved exclusively for:
• graduates of the degree in Architecture Studies from Spanish universities.
• graduates who fulfill the conditions outlined in Ministerial Order EDU/2075/2010, of 29 July, and in the Resolution of the General Secretariat for Universities of 28 July 2010.

Places
100

Pre-enrolment
Pre-enrolment closed (consult the new pre-enrolment periods in the academic calendar).
How to pre-enrol

Enrolment
How to enrol

Legalisation of foreign documents
All documents issued in non-EU countries must be legalised and bear the corresponding apostille.
DOUBLE-DEGREE AGREEMENTS

Double-degree pathways at the UPC

- Master's degree in Architecture + Master's degree in Sustainable Intervention in the Built Environment (MISMeC)

PROFESSIONAL OPPORTUNITIES

**Professional opportunities**

Graduates of the master's degree are generally employed as managers or as experts working on teams in areas and activities related to architecture, particularly building construction and urbanism.

- Design and management of architectural works.
- Rehabilitation of buildings and urban spaces.
- Restoration of buildings that are listed or protected for their environmental, historical or artistic value.
- Design and management of urbanism works.
- Spatial planning.
- Drafting of ordinances and urban plans on different scales.
- Management of land, landscape and the environment.
- Design and management of building works. Civil works.
- Design, calculation and management of structures, installations and building systems.
- Environmental impact studies of structures, installations and building systems.
- Diagnosis of the energy consumption of buildings and urban spaces.
- Teaching and research.

**Competencies**

**Generic competencies**

Generic competencies are the skills that graduates acquire regardless of the specific course or field of study. The generic competencies established by the UPC are capacity for innovation and entrepreneurship, sustainability and social commitment, knowledge of a foreign language (preferably English), teamwork and proper use of information resources.

On completion of the master's degree, graduates will have acquired the following competencies:

- Ability to conceive, calculate, design and implement building structures and integrate them into existing buildings and urban areas.
- Ability to conceive, calculate, design and implement systems for the division of interiors, carpentry, stairs and other finishing work and integrate them into existing buildings and urban areas.
- Ability to conceive, calculate, design and erect enclosures, roofs and other structural work and integrate them into existing buildings and urban areas.
- Ability to conceive, calculate, design and install water supply, sewage, heating and air conditioning systems and integrate them into existing buildings and urban areas.
- Ability to conceive and develop basic and detailed designs, sketches and drafts.
- Ability to conceive and develop urban design schemes.
- Ability to conceive and carry out construction site management.
- Ability to carry out the functional programming of buildings and urban spaces.
- Ability to intervene in the built heritage and to conserve, restore and rehabilitate it.
- Ability to make architectural criticism.
- Ability to draft and manage urban plans on any scale.
- Ability to conceive, calculate, design and implement systems for the division of interiors, carpentry, stairs and other finishing work and integrating them into existing buildings and urban areas.
- Ability to conceive, calculate, design and erect enclosures, roofs and other structural work and integrating them into existing buildings and urban areas.
- Ability to conceive, calculate, design and install water supply, sewage, heating and air conditioning systems and integrating them into existing buildings and urban areas.
- Ability to conceive and develop basic and detailed designs, sketches and drafts.
- Ability to conceive and develop urban design schemes.
- Ability to conceive and carry out construction site management.
- Ability to carry out the functional programming of buildings and urban spaces.
- Ability to intervene in the built heritage and to conserve, restore and rehabilitate it.
- Ability to make architectural criticism.
Ability to draft and manage urban plans on any scale.
