Master's degree in Atomistic and Multiscale Computational Modelling in Physics, Chemistry and Biochemistry

The master's degree in Atomistic and Multiscale Computational Modelling in Physics, Chemistry and Biochemistry (master's degree website), coordinated by the Universitat de Barcelona (UB) and with the UPC as a participant, is an interuniversity master's degree that provides advanced training in programming tools and the application of various techniques and models to the study of problems in physics, chemistry and biochemistry in which the atomic or molecular structure and properties of matter are relevant. It is oriented towards advanced, fundamental or applied research and employment in the R&D departments of institutions and companies in the technology, pharmaceutical, environmental and energy sectors that analyse complex systems and networks.

---

### GENERAL DETAILS

**Duration and start date**
- 1 academic year, 60 ECTS credits. Starting September

**Timetable and delivery**
- Mornings and afternoons. Face-to-face

**Language of instruction**
- Check the language of instruction for each subject in the course guide in the curriculum.
- Information on language use in the classroom and students' language rights.

**Location**
- Faculty of Chemistry (UB)
- Faculty of Physics (UB)
- Barcelona School of Informatics (UPC)

**Official degree**
- Recorded in the Ministry of Education's degree register

---

### ADMISSION

**General requirements**
- Academic requirements for admission to master's degrees

**Pre-enrolment**
- To enrol for an interuniversity master’s degree coordinated by a university other than the UPC, you must enrol through the coordinating university:
  - Universitat de Barcelona (UB)

---

### ORGANISATION: ACADEMIC CALENDAR AND REGULATIONS

**UPC school**
- Barcelona School of Informatics (FIB)

**Participating institutions**
- Universitat Politecnica de Catalunya (UPC)
- Universitat de Barcelona (UB) - coordinating university
