The *Master's degree in Engineering Physics* is oriented towards frontier engineering based on advanced education in physics. Specialist engineering fields such as nanotechnology, nanoelectronics and biomedical engineering require an ever-growing number of professionals who have extensive training in advanced physics and sound knowledge of quantum physics, complex system physics and device physics, which can be applied both at the nanoscopic scale and in large-scale facilities.

Applicants must prove that they have a bachelor's degree in Physics or Engineering Physics and that they have passed 240 ECTS credits.

---

### GENERAL DETAILS

**Duration and start date**
One academic year, 60 ECTS credits. Starting September

**Timetable and delivery**
Face-to-face

**Fees and grants**
Approximate fees for the master’s degree, excluding other costs, €2,766 (€4,149 for non-EU residents).
More information about fees and payment options
More information about grants and loans

**Language of instruction**
English

**Official degree**
Official university degree.

---

### ADMISSION

**General requirements**
Academic requirements for admission to master's degrees

**Specific requirements**
Applicants must prove that they have a bachelor's degree in Physics or Engineering Physics and that they have passed 240 ECTS credits.

**Places**
30

**Pre-enrolment**
Pre-enrolment closed (consult the new pre-enrolment periods in the academic calendar).

How to pre-enrol

**Enrolment**
How to enrol

**Legalisation of foreign documents**
All documents issued in non-EU countries must be legalised and bear the corresponding apostille.

---

### PROFESSIONAL OPPORTUNITIES

Professional opportunities
- Industries with a strong technology component.
- Basic and applied research centres.
- Frontier engineering in the field of nanotechnology.
- Research centres and large-scale facilities, as a qualified specialist.
- Doctoral training in research centres and universities.

**Competencies**

**Generic competencies**

Generic competencies are the skills that graduates acquire regardless of the specific course or field of study. The generic competencies established by the UPC are capacity for innovation and entrepreneurship, sustainability and social commitment, knowledge of a foreign language (preferably English), teamwork and proper use of information resources.

---

**ORGANISATION: ACADEMIC CALENDAR AND REGULATIONS**

**UPC school**

Barcelona School of Telecommunications Engineering (ETSETB)

**Academic coordinator**

Jordi Martí Rabassa

**Academic calendar**

General academic calendar for bachelor’s, master’s and doctoral degrees courses

**Academic regulations**

Academic regulations for master's degree courses at the UPC
