Master's degree in Landscape Architecture (MBLandArch)

The aim of the master's degree in Landscape Architecture (MBLandArch) is to provide an up-to-date response to current landscaping problems and to equip graduates with skills in landscape analysis, planning, design and management, while including the new challenges of adopting EU directives, laws and standards that refer either directly or indirectly to the landscape.

GENERAL DETAILS

Duration and start date
Two academic years, 120 ECTS credits. Starting September

Timetable and delivery
Afternoons. Face-to-face

Fees and grants
Approximate fees for the master's degree, excluding degree certificate fee, €6,535 (€9,803 for non-EU residents).
More information about fees and payment options
More information about grants and loans

Language of instruction
Subjects will be taught in Catalan, Spanish or English, depending on the student's level of comprehension and on the teaching objectives of the master's degree course.

Location
- School of Architecture of Barcelona (Barcelona).
- College of Agricultural Engineering of Barcelona (Castelldefels) – basic subjects to standardise the level for students coming from courses in Architecture and Engineering.

Official degree
Recorded in the Ministry of Education's degree register

ADMISSION

General requirements
Academic requirements for admission to master's degrees

Specific requirements
In addition, holders of degrees in Architecture, Agricultural Engineering, Forest Engineering and other engineering degrees and diplomas related to spatial development can access this Master's degree.

Admission criteria
- Academic record focusing on the field of landscaping.
- Proof of professional experience within teams of designers.
- Academic certificates proving basic drawing skills will be positively evaluated.

Places
30

Pre-enrolment
Pre-enrolment period open.
How to pre-enrol
**Enrolment**

**How to enrol**

**Legalisation of foreign documents**

All documents issued in non-EU countries must be legalised and bear the corresponding apostille.

---

**DOUBLE-DEGREE AGREEMENTS**

EMiLA, (European Master in Landscape Architecture) is a exchange program between the master's degree in Landscape Architecture from five european universities:

- ETSAB and ESAB, Barcelona, Universitat Politècnica de Catalunya
- Ecole Nationale Supérieure de Paysage Versailles, France.
- Academy Van Bouwkunst, Amsterdam University of the Arts (AHK), the Netherlands.
- Edinburgh College of Arts (ESALA-ECA), United kingdom.
- Leibniz Universität Hannover (LUH), Fakultat für Architektur und Landschaft, Germany.

---

**PROFESSIONAL OPPORTUNITIES**

**Professional opportunities**

Landscape architects work for planning consultancies, for companies in the gardening and landscape industry, for government agencies and for local governments in public works and parks departments, water authorities or and nature conservation bodies.

Their work encompasses a wide range of activities, including the following:

- Landscaping tasks for urban land use; planning and sectoral planning
- Urban planning and village redevelopment planning
- Project planning and design
- Environmental planning
- Planning and programmes for leisure parks and large-scale landscape remediation
- Green and open space planning as part of urban land use planning
- Planning for national parks, biosphere and nature reserves, as well as landscape protection areas

**Competencies**

**Generic competencies**

Generic competencies are the skills that graduates acquire regardless of the specific course or field of study. The generic competencies established by the UPC are capacity for innovation and entrepreneurship, sustainability and social commitment, knowledge of a foreign language (preferably English), teamwork and proper use of information resources.

**Specific competences**

- Ability to undertake professional jobs in the landscape field in which strategic decisions have to be made. In particular, ability to undertake tasks that require a high capacity to analyse and resolve complex landscape and spatial problems.
- Ability to carry out research and knowledge transfer in the professional sector.
- Ability to begin an academic career in the field of research and specifically to begin a doctorate in an international-level landscape programme.

**Specific skills**

- Ability to design and manage the landscape.
- Ability to advise on plans, projects and policies linked to the field of landscape intervention.
