

Position Transducers up to 900 mm

LWH Series

Special features

- very long life > 100 x 10⁶ movements
- outstanding linearity
- high resolution 0.01 mm
- very high operating speed
- connection via plug and socket to DIN 43 650 (hydraulic connector)
- protection class IP 54

LWH transducers are designed for the direct, absolute measurement of displacement or length in control regulation and measuring applications. High resolution (0.01 mm) combined with a stroke length of up to 900 mm permits the accurate measurement of linear displacement. Rack and pinions or similar devices are not required because the design of the transducers is such that they may be built directly into the mechanical system.

Tighter tolerances on the extruded body combined with a special surface treatment permit high operating speeds and reduced wear. A pivoting front bearing overcomes "stick-slip" operation even where some angular or out of parallel errors are present. The technique for fixing and making connections to the resistance track ensures the highest degree of reliability even under harsh working conditions.

The transducer has mounting grooves on all four housing surfaces. Thus the transducer can always be mounted with the resistance element directed upwards (recognizable by the position of the middle mounting groove directly across from the resistance element), independent of the mounting surface.

By mounting overhead on difficult-to-reach machines it is possible to pre-mount the clamps to the mounting surface and then simply "snap-on" the transducer.

Description

Housing	aluminum, anodized
Fixings	see drawing, "snap-on" clamps, adjustable
Actuator	stainless steel, rotatable
Bearings	pivoting sleeve bearing
Resistance element	conductive plastic
Wiper assembly	precious metal multi-finger wiper, elastomer-damped
Electrical connections	4-pole socket to DIN 43650

Important

All values given for this series – including linearity, lifetime, micro-linearity, resistance to external disturbances and temperature coefficient in voltage dividing mode – are quoted for the device operating with the wiper voltage driving an operational amplifier working as a voltage follower where virtually no load is applied to the wiper ($I_e \leq 1 \mu A$).

Included in delivery

1 plug connector GDM 3009,
1 sealing gasket GDM 3-16,
2 fixing clamps with 4 screws
