TO WHOM IT MAY CONCERN

Dear Sir/Madam!

It is my pleasure to recommend Alina Khalitova for Eranet-Plus Exchange Program.

I have known Alina since 2010. Being her professor for more than four years and teaching her a number of classes starting with the foundations of programming and later on more complex and specific disciplines, I watched her academic progress. Alina showed herself as a smart and hard-working student with strong analytical abilities, ambition and initiative. She distinguished herself by unconventional approaches to solving problems thinking outside the box. That is why she was often given most difficult level of assignments. Thus, I was glad to work with her as academic advisor during her senior year.

Our interaction, however, was not limited by the lectures and working on thesis. Being a laboratory assistant of our department in 2013-2014 she was helping me with everyday routine work and willing to accept responsibility. Everyone at the department knows Alina as a person with outstanding communication skills and strong personality. She always showed respect to his class-mates and professors. She works effectively in a team and I believe she enjoys it. I should also note that Alina is polite, very pleasant and tactful person. She will be definitely good in a collaborative work.

All in all, I strongly recommend Alina Khalitova as one of the best students I have supervised for the last years. I have no doubts she will succeed in any challenge Eranet-Plus Exchange Program has to offer. She knows how to work hard and I am firmly convinced that the Polytechnic University of Catalonia will benefit from such a gifted and well-rounded person.

If you have any further questions or if I can be of any further help, please do not hesitate to contact me.
