To whom it may concern

RECOMMENDATION LETTER

I am pleased to write a letter of recommendation for Ms. Elena Plankina. I supervise Elena's scientific research during her master degree. From the beginning of an academic year I have been knowing her as a witty and responsible student.

Her research project is an interdisciplinary work dealing with medical image recognition. Elena demonstrates the thorough grasp of the subject and a keen interest to the topic. The participation in educational program at Radboud University could help Elena to develop the topic and could give her an opportunity to gain an invaluable experience while communicating with research groups which work on various issues related to bioinformatics, especially, on computer-aided diagnosis and medical imaging.

Therefore I have no hesitance to recommend Elena for admission to Eranet Plus exchange program. It is not a common situation when a student works at the same time for two departments. But I am sure that Elena perfectly handles this problem.

Please feel free to contact me for further information.

Yours faithfully,
Mikhail Kirillin
