9. Motivation and Added Value

*** Describe briefly what you consider to be the added value of an international experience in your training process and the development of your future professional activity.**
(Max. 1000 characters)

Exchange program is a unique chance to gather material for my academic research. I would like to talk directly to foreign professionals in order to take a deep look into the matter of problems and analyze the successful experience of Spain in the sphere of computer science. This study tour is a great opportunity to study disciplines connected with application software, computer graphics, parallel computings, programming on the European level and improve my knowledge of English as language of professional communications.
My average mark is 4.2 (out of 5). I am the member of student council, the winner of faculty competition of robotic technology 2012, the winner of competition "InnoBusiness-2014" with IT project "VYadre".I took part in a study tour in Purdue university, US in 2014. I become the "student of the Year" in 2014. My English level is B2 and Italian is A2.
This program is a great chance to make a huge step up not only in professional but also in personal development.
