Evgenii distinguished himself by submitting an extraordinarily well researched and interesting project in computer vision. I would rank him among the top students that I have taught in the past years in respect of his research and presentation skills.

Based on my time working with Evgenii I assess him as a highly intelligent person with good analytical skills. His research demonstrated his ability to develop software of a good quality. Evgenii's overall intelligence is also proved by his grades for the courses, which were by far some of the best in the group.

Evgenii has excellent communication skills. He also demonstrated good team working skills during the research and our collaboration.

At a personal level, Evgenii is a well-disciplined, inventive and industrious student. He went well beyond the course requirements in the quantity and quality of his project, putting in a lot of extra research and attending group meetings every week. Throughout the study and research, Evgenii showed great perseverance and the ability to analyze a large amount of data. He was not only interested in and motivated to learn the material, but put great work into developing his own ideas about innovative projects.

Evgenii is unquestionably an exceptional candidate for Eranet-Plus scholarship. His work in telecommunications suggests that he would greatly benefit from the opportunities for intellectual development provided by studying abroad. I am writing this letter to strongly recommend Evgenii Potapov for Eranet-Plus scholarship application. I know him for 2 years. I met Evgenii when I gave course on the theory of electrical communication to his academic group. It was one of basic discipline in his specialization. I noticed Evgenii on the first lesson. He has asked me several really good and appropriate questions about topic of the lecture, and answered precisely on my questions. Thereby he showed authentic interest to the discipline. He easily passed an exam with an excellent grade.

Next year I became Evgenii's scientific supervisor. The topic of his investigation was "Comparing different methods of image comparison".
