

## DETAILED INFORMATION ABOUT THE ECONOMIC MEDIA REQUIRED TO RENEW THE TIE CARD FOR RELATIVES OF STUDENTS

You can find in these pages the same information that appears in the point 5 (**Economic media**) of the instructions about how to renew a student's TIE card, but including the modifications related to **relatives of students**, for every one of the 5 options that the Spanish authorities accept.

**RELATIVES:** A copy of the **economic media of the student** must be included in the documents presented for every one of his/her relatives. There economic media must evidence that **the student has economic means enough to maintain every one of his/her relatives plus him/herself**.

It is to say, a photocopy of the documents that show the economic means of the student must be included for every beneficiary.

Note: In case some of the beneficiaries have economic media on their own, these won't be considered by the Spanish authorities, only the ones from the student.

However the required amount **will depend on the number of persons** that have to live by means of such an amount:

**The definition indicates:**

***"As to the amount required to maintain the students relatives, the 75% of the IPREM will be monthly required for the first relative (450 euros) and the 50% of the IPREM will be monthly required for every one of the rest of the relatives (300 euros)."***

Therefore, for any of the possible options, you have to calculate the amount corresponding to the percentage (weight) of each one of the beneficiaries, and after that, sum up all the amounts.

	Weight, as a percentage of the IPREM	Monthly individual amount
Student	100%	600 €
First relative	75%	450 €
Second relative	50%	300 €
Third relative	50%	300 €

→**Option 1:** A statement of an account of a Spanish Bank or a Spanish Savings Bank showing the deposits and withdrawals of the last 6 months with a **stamp from the Entity**. It must contain your name as a holder of the account and the **final balance** of the statement must be **at least of 3.600 €** (and the **average amount** of the credits you receive must be **equal or greater than 600 €/month**).

- In this case, the Spanish authorities require that both the monthly average amount and the final balance amount must be increased: for the first relative, the monthly amount must be increased as you can see in the table above; as to the final balance, the amount of 3.600 € euros required for the student must be increased with the 75% of that amount for the first relative and with the 50% of that amount for every one of the rest of the relatives.
- Please find here below an example: a family with two children in which the student is one of the parents and the relatives are all beneficiaries of him/her:
  - o Minimum monthly amount:  $600 \text{ €} + 450 \text{ €} + 300 \text{ €} + 300 \text{ €} = 1.650 \text{ €}$ .
  - o Final balance amount of the statement of account:  
 $3.600 \text{ €} + 2.700 \text{ €} + 1.800 \text{ €} + 1.800 \text{ €} = 9.900 \text{ €}$ .

→**Option 2:** A statement of an account of a Spanish Bank or a Spanish Savings Bank and with a stamp from the Entity. This statement must show your name as the holder of the account and a **minimum current credit balance of 7.200 €**.

- For **OPTION 2**, you have to add, to the amount of 7.200 € of the student, the 75% of it for the first beneficiary; and the 50% of said amount for every one of the rest of the beneficiaries.
- Consequently, in the previous example of the family with two children, the total amount of the final bank account balance should be a minimum of: 19.800 €.

FOR THE REST OF OPTIONS, THE AMOUNT RECEIVED BY THE STUDENT (FROM A SCHOLARSHIP OF A FAMILIAR ASSISTANCE), OR THE AMOUNT GUARANTEED BY THE PERSON THAT COMMITS HIM/HERSELF TO MAINTAIN THE STUDENT, MUST BE INCREASED IN THE SAME WAY, ACCORDING TO THE PREVIOUSLY MENTIONED SCALE:

**“As to the amount required to maintain the students relatives, the 75% of the IPREM will be monthly required for the first relative (450 euros) and the 50% of the IPREM will be monthly required for every one of the rest of the relatives (300 euros).”**

→**Option 3:** The evidence of being in possession of a scholarship, official and recognized by the European Union. It must specify the monthly amount to receive in Euros.

→**Option 4:** Scholarship or a financial assistance from your family in your country of origin. The document must state that the amount (that should be higher than 600€ for the student, plus 450 € for the first beneficiary, plus 300 € for every one of the rest of the beneficiaries; the sum of the amounts will be the minimal amount to be sent monthly) will be monthly sent, in which way (by means of a bank transfer, for instance) and during which period (from February 2023 to December 2023, for example). The document must also be legalised at the origin country, by means of the Apostille of The Hague (if the origin country had signed The Hague Agreement) or by the Spanish Embassy at the origin country.

→**Option 5:** Maintenance commitment from a relative living in Spain. It can be proved by means of:

- An affidavit (notarial deed)

**The following documents are also required and will have to be added:**

- If the student's relative is a wage-earner, his/her work contract and his/her three last payslips must be enclosed
- If the student's relative is a self-employed person, the last tax declaration and the last receipt of the payment he/she does as a self employed person must be enclosed.
- Kindship evidence: by means of a document from the origin country, duly legalized or a document issued by the Consulate of their origin country in Spain, also duly legalized.
- 

**The relative person that commits him/herself to maintain the student must:**

- Have the condition of legal resident in Spain
- The student and the relative who commits to maintain him or her must be relatives within the second degree of consanguinity or affinity (it includes partnership duly registered).

*Note: In case that the student lives with the person that takes the responsibility to maintain him/her (a certificate of cohabitation will be required), the amount that the person that commits to maintain the student should dedicate to his/her maintenance will have to be only of the 30% of the IPREM, it is, 180 €.*

To sum up, and depending on the number of members of the family, here below we indicate the minimum amounts to be justified:

Number of members of the family/ amounts depending on the options	Option 1		Option 2	Options 3, 4 o 5
	Monthly amount available and justified	Total and final balance in the bank account	Total and final balance in the bank account	Monthly amount available and justified
Student + 1 Beneficiary	1.050 €	6.300 €	12.600 €	1.050 €
Student+ 2 Beneficiaries	1.350 €	8.100 €	16.200 €	1.350 €
Student+ 3 Beneficiaries	1.650 €	9.900 €	19.800 €	1.650 €
